

Advanced Formula for  
Rumen & Gut Problems

# Rumetek GOLD

Powder

Cattle feed supplement (Saccharomyces cerevisiae),  
produced by an advanced proprietary process for  
increased prebiotic effect.

## Composition :

Each 10gm Contains :	
Saccharomyces cerevisiae	10X10 <sup>9</sup> CFU
Lactobacillus acidophilus	10X10 <sup>7</sup> CFU
Lactobacillus subtilis	10X10 <sup>7</sup> CFU
Insulin	100 mg
DL-Methionine	500 mg
L-lysine	200 mg
Manganese chelated	70 mg
Zinc chelated	100 mg
Cobalt chelated	20 mg
Copper chelated	55 mg
Selenium	2 mg
Amylase	30 mg
Lipase	30 mg
Protease	20 mg
Cellulose	30 mg
Beta glucanase	30 mg
Xylanase	30 mg

## Usage :

Cow, Buffalo & Horse 10-20 gm. daily  
Sheep & Goat 5-10 gm. daily  
Mix recommended dose of Rumetek Gold powder  
in cattle feed and use once daily or ensure a  
general dose as 2% in daily feed ration.  
For regular feeding  
Mix 1 kg. in each 100 kg. of feed  
Or as directed by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 500 gm & 1 Kg

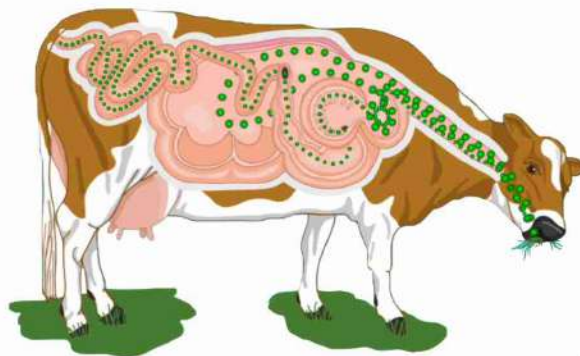

Highly effective in nature

Reaction free

Accurate formulation

Rumen health is a key for production success. The rumen, or the fermentation vat, is used for feed digestion and provides energy to maintain the animal and production. However, there is more to cattle digestive tracts than just the rumen. The entire digestive tract from start to end needs to be in in tip-top shape to prevent pathogens in feed from escaping from the digestive tract. The small and large intestine has drawn the attention of some researchers to further the understanding of how stress affects gut health in these regions of the digestive tract.

**RUMETEK GOLD** as a feed additive in ruminants. The use of feed additives containing live microorganisms and (or) their metabolites to alter rumen fermentation and improve animal performance has increased in response to demands for using more "natural" growth-promoting substances.

## Advantages :

- Improves the gastrointestinal function in cattle
- Improves the milk productivity & increases the fat percentage in milk.
- Makes the skin healthy and smooth and also improves the natural shine of skin
- Helps to fulfill the silica & calcium requirement naturally in cattle
- Stimulates milk-producing cells.
- Keeps the liver healthy
- Improves the hunger in cattle and facilitates better digestion
- Reduces stress in Cattle
- Minimises the annual expenditure on cattle health
- Ensures proper growth and metabolism
- It also controls the gut bacteria in Cattle

# Rumetek

Bolus

**Probiotics With Enzyme,  
Biotin & Other Metabolites**

## Composition :

Each Bolus Contains :

Saccharomyces cerevisiae	50X10 <sup>9</sup> CFU
Lactobacillus acidophilus	30X10 <sup>7</sup> CFU
Lactobacillus sporogenes	20X10 <sup>7</sup> CFU
Fructo oligosaccharides	300 mg
Biotin	10 mg.
DL-Methionine	1 gm.
Zinc sulphate	200 mg.
Cobalt sulphate	40 mg.
Copper sulphate	100 mg.

## Usage :

Large Animal :1-2 bolus daily  
Small Animal: ½ bolus daily

Or as directed by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

**Presentation : 5 strips of 4 bolus**

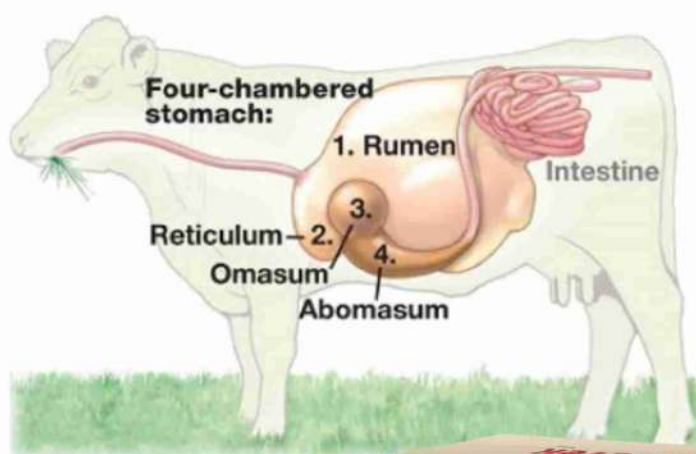

Highly effective in nature

Reaction free

Accurate formulation

Probiotics in animal feed have a special role in the digestion, performance, and immune system of animals. The number of microbes must be in a balance ratio in the rumen of animals for better health and growth. So to maintain proper pH in the animal rumen and to maintain a balanced ratio of microbes for proper digestion. We has launched special boluses for cattle for digestion named **RUMETEK Bolus** as a complete mixture of probiotics or yeast especially Saccharomyces Cerevisiae, Enzymes, Amino Acids that are expected to escape rumen fermentation.

**RUMETEK** Bolus acts as a growth promoter. It helps in Digestion Problem in Animals. It helps to improve Digestion Process. It helps to normalize the Rumen pH level. Its an ideal feed supplement for Cow, Buffalo, Horse, Goat, Sheep, Swine, Calf, Pig, Farm Animals, Livestock.

## Advantages :-

- Stimulates secretory activity of liver for proper digestion.
- Augments population of Ruminal Microflora & cellulolytic bacteria for proper digestion.
- Restores appetite in Non-specific anorexia.
- Normalizes Ruminal pH & Ruminal Movement.
- Supportive therapy with antibiotic/dewormers.

# UTROVAN

## Ecbolic & Uterine Cleanser

### Composition :

Each 100 ml Contains :

Asparagus racemosus	6000 mg.
Aristolochian indica	5000 mg
Ashwagandha	500 mg
Bambusa arundinnacea	4500 mg
Crotalaria juncea	5500 mg
Citrullus colocymthis	5000 mg
Crataeva nurvala	5000 mg
Gossypium herbaceum	5500 mg
Gloriosa superba	2500 mg
Nigela sativa	5500 mg
Plumbago zeylancia	5500 mg
Kambha	200 mg
Sripthal	500 mg
Kankali	200 mg
Kantkari	200 mg
Leptadenia reticulata	200 mg
Asparagus	200 mg
Lysine	500 mg
Zinc sulphate	500 mg
Cobalt chloride	50 mg
Copper sulphate	1000 mg
Excepients	qs

### Usage & administration:

After parturition 1st dose 225 ml. &

2nd dose 225 ml. after 3 hours

Followed by 150 ml once daily next 3-7 days

Anoestrus (Heifer) : 150 ml. continue 21 days.

In case of retention of placenta, the dose should be tripled and repeated after every three hours until the foetal membranes are expelled out.

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 450 ml & 900 ml

Highly effective in nature

Accurate formulation

The uterus is one of the most important parts of the reproductive system of cattle. However there are several odd conditions accounted for the uterus as "METRITIS" which is inflammation of uterine tissue may be due to Bacterial Infection, Injury Etc. Metritis may be postpartum or prepartum.

In normal cases there will be Bacterial Infection, Injury to uterine tissues maybe by untrained A.I worker during A.I. Here there is swelling of uterine tissues seen along with mucus discharge which is known as "PYOMETRA" It may influence the Heat Cycle, Reproductive Efficiency, Hormonal Balance of the body leading to other reproductive problems. However, Pus Discharge may also be passed on to udder or teat leading to MASTITIS where there is sudden milk drop or swelling of the udder.

So to treat the infections we have come in market with Herbal Eobloc and uterine tonic "UTROVAN" In the consists of herbs So there are no side effects on the body of the Cattle.

### Advantages :

- Cleansing of uterus postpartum
- Ensure timely expulsion of the placenta
- Ensure Timely estrus and conception
- Conditions like Pyrometer, Endometritis, repeat breeding, etc.
- To prevent postpartum complications
- In case of Retention of Placenta

# COOLLYF

POWDER

Maintains electrolyte balance of the body  
& increase energy balance  
during stress in  
Poultry & Livestock

## Composition :

Each 100gm. contains :

Potassium chloride	3.5 gm.
Magnesium sulphate	1.20 gm.
Sodium chloride	1.75 gm.
Sodium bicarbonate	1 gm.
Sodium citrate	2.50 gm.
Calcium lactate	1.10 gm.
Dextrose	40 gm.
Vitamin C	1 gm.

## Usage & Administration:

Cow, Buffaloes & Horses:

100 - 200 gm./ day

Calves, Sheep, Goats & Dogs :

10 - 20 / day

## Poultry :

1 gm./ 2 litre of water for 3-6 days  
or as directed by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

## Presentation :

1kg, 5 kg & 10 kg

Highly effective in nature

Reaction free

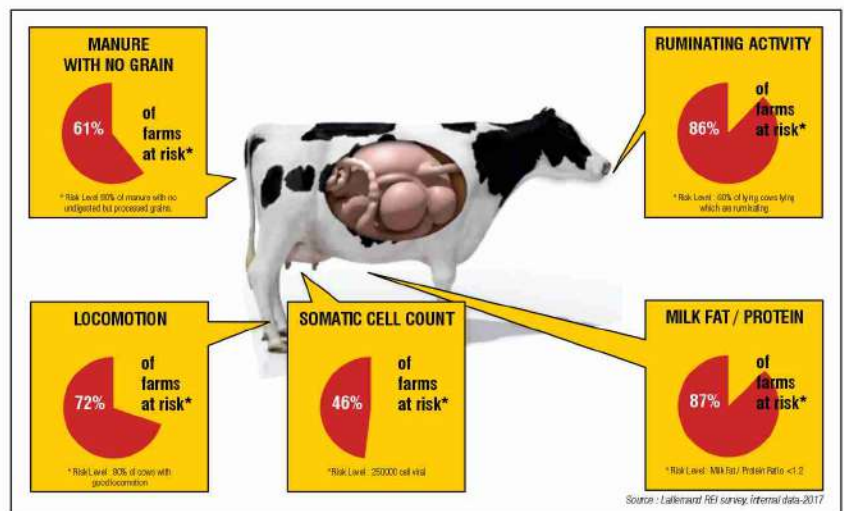

Accurate formulation

Stress is the major problem in livestock which leads to the decreased efficiency of livestock. In the case of poultry, it also undergoes several types of stresses may be vaccination, transport, summer, debeaking, allergic, reproductive stress, etc.

Stress during summer leads to dehydration, diarrhea like conditions in livestock and also leads to decreased egg production in poultry. So these types of stresses future lead to other critical conditions like negative energy balance, ketosis, hypocalcemia, etc. in large animals.

This uniqueness of this formula is that it gives immediate response.

**Coollyf** is a unique solution as oral rehydration, an anti-stress and antidiarrhoeal formula for cattle, poultry, equine, sheep and goats

## BENEFITS

- Provide resistance against summer's warmth.
- Maintains milk production
- Fight against oxidative stress & maintains immunity
- Maintains body temperature.
- Render the animals active, lively and healthy.
- Maintains body pH
- Dehydration.
- Keep stomach cool & Relieves summer stress.
- Optimum output in summer weather.
- Controls Heat Pressure.

Accurate formulation

Vitamins & Minerals are necessary micronutrients that are not generated naturally. These are must be available in the feed for cattle and poultry for healthy growth. Apart from growth, essential vitamins & Minerals promote the optimal immune system and boost reproduction and lactation. Finding reliable and cheap vitamin sources is always a struggle for farmers because too many supplements will increase feeding costs.

For dairy cattle farmers, the availability of high-quality fodder is limited. The area available for grazing continues to decrease every year, resulting in poor feeding of the cattle.

**VITVAN-M** also increases weight gain in broiler chickens. It strengthens poultry birds, resulting in increased egg production. By boosting the immune system, it greatly helps in reducing early chick mortality. The liquid organic supplement can be easily mixed in with the feed.

## Advantages :

- Maintains the deficiency of trace minerals & vitamins.
- Provides defense against oxidative stress & minimizes the effect of heat stress thus prevents panting.
- Improves immunity & disease resistance
- Makes udder healthy & larger.
- Prevents infertility & reproductive problems.
- Enhances growth & production.
- Helpful to prevents (Internal & External) bleeding & promotes fast wound healing.

To bring a boom in the dairy field we have launched a liquid cattle feed supplement that guarantees to increase milk yield in dairy animals. You can get these cattle milk booster in the form of liquid that helps enhance milk yield in dairy animals by offering a high level of energy for maximum production and growth.

**ENERZION** can be very beneficial for animals. It improves blood glucose level and prevents parturition-related disorders and Ketosis. It acts as the most powerful energy booster, milk enhancer, as well as immunity booster or anti-stress liquid during any type of stress condition, maybe lactation stress, heat stress, disease stress which is leading to negative energy balance in the animals during Pre-partum, Post-partum & Peak lactation.

It is highly useful as an energy booster for recovering or preventing the weakness that occurred in animals during the pregnancy period.

**COMPOSITION :**  
**EACH 1 LTR. CONTAINS**

Gluconeogenic precursors fortified with	
Vitamin E	2500 mg.
Vitamin. D3	2500 I.U.
Pantothenic Acid	190 mg.
Niacinamide	10 mg.
Vitamin B6	170 mg.
Vitamin B2	165 mg.
Vitamin B12	600 mcg.
Hydrated trisodium citrate	75 mg.
Lactic acid	20 mg.
Lactose	1.50 gm.

**Nutritional supplement for High Lactating Animals**

**Usage & Administration :**

200 ml twice daily for first 2 days,  
followed by 100 ml daily for next  
2 days orally  
Or as directed by the Veterinarian.

Animal Feed Supplement

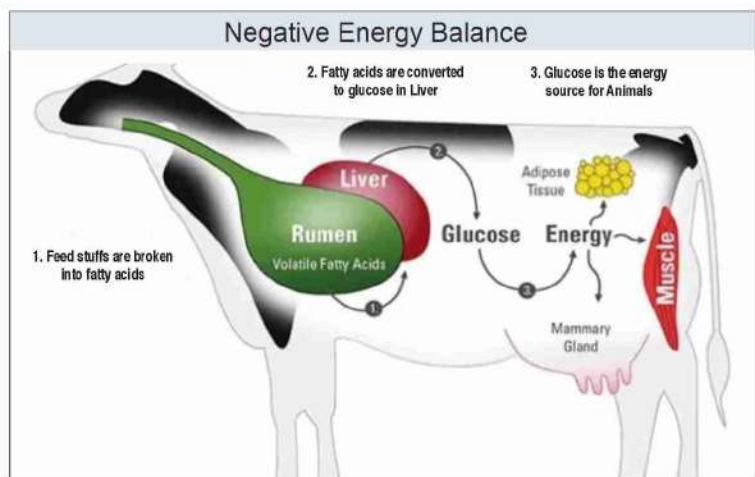

Not for Medicinal / Human use

**Presentation : 500 ml & 1 Litre**

Highly effective in nature

Reaction free

Accurate formulation

**Benefits :**

- Helps to control negative energy balance in high lactating cattle.
- Improves blood glucose level.
- Prevents parturition-related disorders.
- Augments milk production.
- Acts as anti-stress.
- Prevents ketosis & the chance of recurrence.
- Helps to stop formation of ketone bodies.
- Energy source in ruminant diets.

# Respitek

Liquid

Herbal Feed Additive for cough  
Coryza & Respiratory Problems

Each 100 ml. Contains Liquid form  
of following plant ingredients :

Adhatoda vasica	800 mg
Ephedra geradiana	300 mg
Hedychium spicatum	250 mg
Eucalyptus globulus	200 mg
Solanum xanthocarpum	250 mg
Cassia occidentalis	250 mg
Terminalia bellirica	220 mg
Saussurea lappa	200 mg
Glycyrriza galbra	200 mg
Alpinia kulanjana	150 mg
Achorus calamus	150 mg
Piper nigrum	150 mg
Piper longum	100 mg
Pistacia integerrima	100 mg
Zingiber officinalis	100 mg
Ocimum sanctum ext.	100 mg
Abies webbiana	50 mg
Excipients	q.s.

#### Usage & Administration :

Cow, Buffalo & Horse: 25 ml. twice daily  
Calf, Sheep, Goat & Pig : 15 ml. twice daily

#### POULTRY : For Each 100 Birds

Chicks : 5 ml. daily  
Growers & Broilers : 10 ml. daily  
Layers & Breeders : 15 ml. daily

Animal Feed Supplement

Not for Medicinal / Human use

In case of stress condition as transportation, heat, humidity, high stock density, etc poultry birds & Cattle are more prone to pathogens as Mycoplasma, Herpes virus, etc These all leads to Respiratory problem. Some other as fungal infection as Aspergillus leads to Inflammation of lungs, Air sacs. Bacterial infections as Pasturella leads to Pneumonia.

Type-A influenza virus leading to Avian influenza causing severe economic loss to farmers and high mortality rate. IBV (Infectious Bronchitis) caused by Corona virus leading to coughing and Wrinkled eggshells. ILT (Infectious Laryngotracheitis) caused by Herpes-virus leading to Bloody Mucus. CRD is Chronic Respiratory Disease is seen in backyard fowls leading to Snuffing, Sneezing, Coughing, etc

**RESPITEK** is the best supportive therapy in Respiratory disease of any origin as it favors soothing of the respiratory tract and faster recovery.

**RESPITEK** mainly composed of Herbal extracts for soothing and of Natural essential, effective and highly useful in Respiratory problem in Cattle & birds

#### Advantages

- Respiratory Supplement Made of High-Quality Vitamins and Supplements
- Helps to Cure Cough, Cold and Respiratory Ailments
- Reduces Risk of Stress and Pain
- Anti-inflammatory & Decongestant
- Facilitates easy breathing with optimum oxygen uptake

# VITVAN-H

Liquid

True Concentrate with Tricholine & Vit. H

**The udder conditioner for peak performance of udder**

Composition : Each 10 ml contains:

Tricholin citrate	1000 mg
Niacinamide	30mg
Vitamin A	120000 IU
Vitamin D3	60000 IU
Vitamin E	500 mg
Vitamin H	2000 mcg
Zinc	200 mg
Cobalt	200 mg
Selenium	1 mg

Recommended usage :

Cow & Buffalo	: 20 ml/day orally
Calf	: 5 ml/day
Sheep & Goat	: 5 ml/day
Poultry	: 5-10 ml/100 birds

Animal Feed Supplement

Not for Medicinal / Human use

**VITVAN- H** is the best vitamin H for cow supplement that is also suitable for different types of cattle and poultry. The vitamins promote the overall wellbeing of the animals. They also help in improving animal performance. Studies have shown that biotin addition to lactating dairy cows resulted in a significant increase in milk production. Even a slight increase in lactation will result in greater profitability for the Dairy farm. The vitamin cow supplement also helps prevent mastitis, which is a common complication in lactating cows. The ability of teats to hold milk determines the occurrence of mastitis.

**VITVAN- H** helps in improving teats and their ability to hold milk. This reduces the possibility of mastitis. Minor cases can also be resolved easily with the regular use of the vitamin supplement. The product contains active ingredients that instantly boost animal health.

#### Benefits :

- Better growth & udder health
- Improves teats milk holding capacity
- Increased milk yield & production
- Improves growth of calves
- Improves shine on skin coat
- Improves egg production in poultry
- Prevention of fatty liver
- Stimulate to immune system
- Reduction in stress

# Selvan-E

Liquid

Potent combination of Vitamin E and Selenium fortified with Biotin

## Composition

Each 100 ml contains

Vitamin E	250 mg
Biotin	200 mcg
Selenium	200 mg
Excipients	q.s.

## Dosage & Administration:

Cattle, Buffalo & Horses	: 10-15 ml daily
Camel, Calves	: 5-10 ml daily
Sheep & Goats	: 2.5 ml daily
Poultry (Each 100 birds)	
Chicks	: 5 ml daily
Layers & Broilers	: 10 ml daily
Breeders	: 20 ml daily
or as advised by the consultant veterinarian.	

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 500 ml & 1 Litre

Highly effective in nature

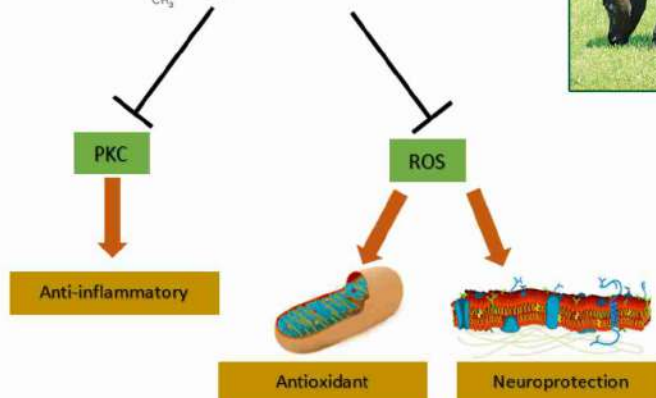

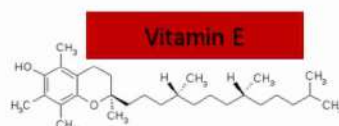

Reaction free

Accurate formulation

Vitamin E and Selenium are required to build the Immune system in the animal's bodies as they play a role as "Antioxidants".

Selenium deficiency in newborn calves leads to white muscle diseases and retains the placenta in newly calved cows. Vitamin E and Selenium play a major role in the treatment of mastitis as deficiency of any one of them may lead to increased incidence of mastitis. Feeding of vitamin E may lead to a New tropic activity to kill bacteria observed at calving.

Most of the diseases in dairy cows occur at or just after calving as it is mainly due to immune suppression leading to susceptibility to infections. Prepartum immune suppression is mainly due to endocrine changes and due to feed intake of improper nutrients. Vit E is fat solvent vitamin not synthesized in rumen however it is essential for dairy cattle as well as calves

## Indications:

- Helps to maintain muscle strength.
- Prevent white muscle disease in sheep & goats.
- Prevent heart muscle dystrophy in calves due to selenium and/or vitamin E deficiency.
- Enhanced immune response.
- Improved fertility and hatchability.
- Improved antibody titre.
- Reduce Leg Weakness in Broilers
- To Overcome Stress in Poultry Birds
- Improves Milk Quality & Prevent White Muscle Disease in Cattle

# EnerziOn

Source of real energy **GEL**

Rich Source of Ionic Calcium,  
Propylene Glycol, Vitamins & Minerals

#### Each 300 gm contains :

Propylene glycol	54000 mg
Carbohydrate	1,80,000 mg
Ionic Calcium <sup>++</sup>	19800 mg
Phosphorus	10200 mg
Vitamin D3	11400 I.U.
Vitamin A	3,60,000 I.U.
Potassium	3000 mg
Manganese	3000 mg

#### Direction for use :

For higher milk yield, administer one bottle per animal per day for 3-5 days .  
Or as directed by the veterinarian.

#### Administration :

- Remove the seal of the bottle hold the head of the animal in a normal to slightly elevated position.
- Carefully place the nozzle into the back of mouth.
- Administer the entire content of the bottle by slowly squeezing.
- Do not administer to animal that are unable to swallow.

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 300 gm

It is instant energy source with ionic calcium as calcium feed supplement for cattle or livestock animals used as oral therapy to treat milk fever or hypoglycemia.

Also a good source of ionic calcium which is 5 times stronger than another oral calcium source so highly useful in milk fever or mastitis where there is a sudden drop in milk production occurs.

As a requirement for calcium after calving is twice or thrice the requirement before calving. So cow needs a high dose of as calcium. Otherwise, drop in calcium may lead to clinical and sub clinical hypoglycemia or milk fever.

**EnerziOn** ensures rapid & efficient absorption of calcium and enhances serum calcium level within 15 min. of oral administration maintains serum calcium level longer than I/V calcium therapy.

#### To prevent milk fever :

Give one bottle at the first sign of calving & give another bottle 6 to 12 hours post calving, repeat every 12 hours as needed or as directed by the veterinarian. A post calving dose of **Energy On Gel** is very beneficial.

#### Indications:

- To prevent milk fever & associated complications
- To increase milk yield & udder health
- For prevention of ketosis
- To normalise contraction of uterus, normal calving & timely expulsion of placenta
- Useful in off-feed conditions
- Useful in acidosis & heat stress

**Energy On Gel** is a comprehensive nutritional supplement formulated to supply the essential nutrient to dairy animals.

## Antibloat Solution For Instant Relief

# BLOTOWIN

Anti flatulence and anti bloat  
for abdominal discomfort due to  
occurs gastrointestinal gas

### Compositions :

Each 10 ml contains	
Ajwain Ext.	6.67 ml
Pinus Longofolia oil	1.0 ml
Linseed Oil	2.33 ml
Purified Hing	10 mg
Yavakashar	35 mg
Acasia Arabica	800 mg

### Usage :

Cattle & Buffalo:	100 ml
Sheep & Goat:	20-30 ml

Administer orally as drench or intra  
ruminally by using cannula or a long needle.

Or as directed by the veterinarian.

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 100 ml

Highly effective in nature

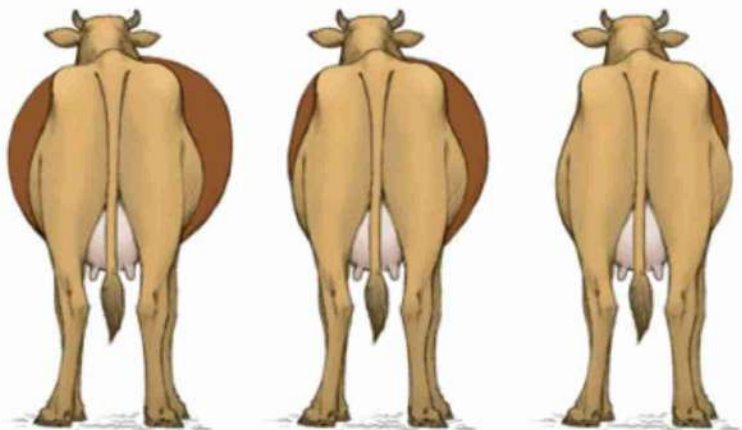

Reaction free

Accurate formulation

Bloating is an abnormal accumulation of gas in the rumen. This is very common in both dairy and beef cattle. In primary ruminal tympany or frothy bloat, the cause is the entrapment of normal gases of fermentation in a stable foam. Bloat is commonly seen in spring and autumn when grass growth is at its peak. When bloating occurs the gases can't escape & they build up and cause sewer distention of the abdomen.

### Clinical signs and differential diagnosis

Bloat is a very common cause of death if not observed properly, such as pastured and dry cattle usually are found dead, if bloat is not taken care of properly. In primary pasture bloat, the rumen becomes distended suddenly. When the cattle experience bloat. The degree of forestomach enlargement can vary. Other signs are colic with kicking at the abdomen. Some animals may exhibit stretched stances with rear feet placed far back. Open-mouth breathing, cyanosis of mucous membranes occur in an extreme case.

### Indications :

- Frothy bloat.
- Tympany.
- Colic.
- Impaction

### Advantages :

- Control fermentation and excessive formation of gas.
- Accelerates the ruminal movement.
- Helps to overcome acid indigestion and maintains normal ruminal pH.

# MILKO BOOM

Liquid

**A unique Milk Booster Tonic of Cal., Phos  
Enriched with Milk Thistle, Satavari & Jivanti**

Each dairy farmer wants proper growth of dairy animal so that they can give adequate milk to go for sale. When we talk about milk yield it directly means we have to give animal a diet rich in calcium because, due to milk yield a lot of calcium goes out of the animal's body. Calcium is also essential for optimum milk production and growth rate. Calcium is one of the main components of bone and so is an important but often overlooked factor in achieving proper growth in young cattle. Growth rate is slower if calcium intake is inadequate.

**Milko Boom** provides a magical calcium feed supplement. It is high potency double strength calcium which helps to increase milk yield higher and prevents milk fever. It is an instant calcium source for cattle after parturition which enriched with milk enhancing herbs.

#### Composition :

Each 100 ml contains:

Calcium	7200 mg
Phosphorus	3600 mg
Vitamin B12	400 mcg
Biotin	200 mg
Trigonella Foevnum graecum Ext.	200 mg
Gossypium herbaceum Ext.	200 mg
Eruca sativa Ext.	200 mg
Ashwagandha	2000 mg
Milk Thistle	1500 mg
Jiwanti	2000 mg
Shatavri	2000 mg
Glatagogue	5%
Energy Value	100 Kcal.

#### FEEDING SCHEDULE:

150 gm. 6-12 hours prior to calving 150 gm. within 6-12 hours after calving or 50-100 gm. daily.

Or as directed by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 500 ml & 1 Litre

Highly effective in nature

Reaction free

Accurate formulation

#### Advantages :

- Prevention of milk fever
- Fulfilling the instant calcium requirements immediately after parturition
- Increases milk production & SNF.
- Improves liver function
- Provides balanced energy stamina
- Helps to improve overall health of livestock.
- Increases Fat% in milk.
- Increase resistant power in animal

# VANVIT-B

## Forte

Liquid

B-Complex enriched with L-Lysine,  
Choline Chloride & Methionine

### COMPOSITION

Each 5 ml. contains extractive  
derived from :

Vitamin B1	7.5 mg
Vitamin B2	2.5 mg
Vitamin B6	1.25 mg
Vitamin B12	12.5 mcg
Vitamin H (Biotin)	18.75 mg
Niacinamide	37.5 mg
D-Panthenol	2.5 mg
DL-Methionine	5 mg
Choline chloride	15 mg
L-Lysine	20 mg

Fortified with Vitamins B of yeast extracts

### Feeding schedule :

Cattle	: 20 ml daily
Chicks	: 10-15 ml per 100 birds
Growers	: 15-20 ml per 100 birds
Layers/broilers	: 15-20 ml per 100 birds

Or as directed by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 500 ml & 1 Litre

Highly effective in nature

Reaction free

Accurate formulation

### ADVANTAGES :

- Improves growth, body weight & productivity.
- Increases appetite & better FCR in poultry
- Boost up digestive efficiency
- Facilitate metabolism of amino acids & carbohydrate
- Supportive therapy with anti-biotic & anthelmintics
- Helps treat anaemia, muscle weakness
- Helps prevent diarrhoea, heatstroke, and stress
- Promotes weight gain
- Improves egg production in layers
- Protects birds from CRD and salmonella infection
- Prevents early chick mortality

Vitamins are necessary micronutrients that are not generated naturally. These vitamins must be available in the feed for cattle and poultry for healthy growth. Apart from growth, essential vitamins promote the optimal immune system and boost reproduction and lactation.

For dairy cattle farmers, the availability of high-quality fodder is limited. The area available for grazing continues to decrease every year, resulting in poor feeding of the cattle. The cost of cattle feed continues to increase, and farmers find it hard to reduce feeding costs.

Maintaining a hygienic and temperature-controlled environment is crucial for both cattle and poultry. The feed offered must be supplemented adequately to ensure that cows and birds grow rapidly. Finding the right supplements that don't add to the economic burden is always challenging.

# Immuvan

Liquid

Immunomodulator, Adaptogenic  
Anti-stress & Growth Promoter  
Herbal formulation

## COMPOSITION :

Each 100 ml. contains extractive derived from :

Arnica Montana	3 gm
Echinacea Purpurea	2 gm
Calendula Officinalis	4 gm
Tinospora Cordifolia	5 gm
Withenia somnifera	2 gm
Azadirachta indica	4 gm
Panax Ginseng	1 gm
Ocimum sanctum	5 gm
Piper Longum	1 gm
Emblca officinalis	3 gm
Zingiber officinalis	2 gm
Hydrocotyl asiatica	3 gm
Aqua	q.s. to 100 ml

## Usage :

Large animals	30-50 ml. per day
Small animals	15-20 ml. per day
Poultry (For Each 100 Birds)	
Chicks	5 ml Daily
Growers & Broilers	10 ml Daily
Layers & Breeders	15 ml Daily:

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 500 ml & 1 Litre

Highly effective in nature

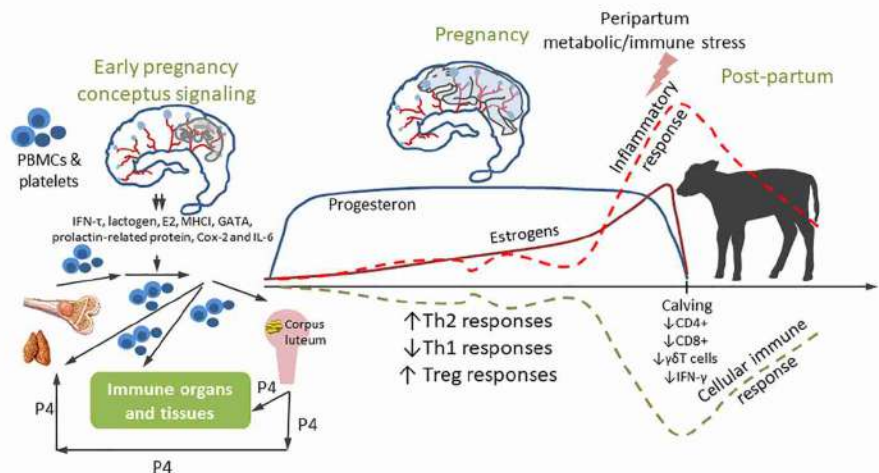

Reaction free

Accurate formulation

**Immuvan** is the best growth booster for cattle in the market that improves growth and development in cattle and poultry. It helps in increasing weight gain, increasing milk production. When the immune system is fully functional, it can easily fight common infections like mastitis. One of the biggest benefits of **Immuvan** is that it improves fertility and productivity. It helps heifers reach early puberty and supports the animal throughout the pregnancy.

During the high lactation period, It helps to increase milk production also helps in improving the immunity of young calves. Post-birth period introduces lots of stress to the cows.

For poultry, **Immuvan** benefits farmers by promoting weight gain. Broilers can gain fat and weight quickly while being disease resistant. It increases egg production in layers and improves reproductive ability and hatchability.

## ADVANTAGES:

- For better growth and production
- Improves nutrition retention & better FCR
- It strengthens the immune system and prevents microbial attack. Provides the herbs, which have been used to support healthy digestion, energy production, and detoxification—functions compromised by chronic stress.
- Improves body weight
- Prevents production failure due to nutritional deficiencies
- Overcomes heat stress and other types of stress
- Reduces mastitis incidents
- Boosts recovery from infections
- Increases quality and size of eggs

Live yeast culture 25X10 CFU

Live lactobacillus sporogenous

Culture 200 million CFU

**USAGE :**

Cow, Buffalo & Horse 30 gm. daily to be mixed in feed

Sheep & Goat 10 gm. daily to be mixed in feed

For regular feeding Mix 1 kg. in each 100 kg. of feed

Poultry 200-500 gm./ 100 kg. of feed

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 1 kg & 5 Kg

Highly effective in nature

Reaction free

Accurate formulation

Various functions of the animals body, including growth, muscle formation, bone health, and various other processes, are affected by the mineral composition . Even though vitamins and minerals are considered micronutrients, they are crucial for the overall health and well-being of animals. Dairy Farmers need an all-in-one solution to maintain and improve the health of the farm animals. While the cattle and poultry feed are designed to provide all nutrients, supplementing the regular feed will greatly improve profitability.

The micronutrients are not absorbed properly by the body. That is why a chelated mineral mixture is more useful in cattle, poultry, and pigs. The vitamins and minerals are present together with a chelating agent. The chelating agent helps in the absorption of vitamins and minerals essential for overall growth. The immune system is strengthened with the regular supply of essential nutrition. This helps the animals to become disease resistant.

**Benefits :**

- Increase milk production in cattle
- Increase egg production in poultry
- Promote growth in pigs
- Improve fat and SNF in animal milk

Copper	1,200 mg
Zinc	3,000 mg
Cobalt	150 mg
Potassium	100 mg
Sodium	5 mg
Sulphur	72%
Selenium	10 mg
Fluorine not more than	300 mg

## Usage & administration :

Large Animals	25-40 gm to be mixed in feed
Small Animals	10 -20 gm. to be mixed in feed
For regular feeding	Mix 1 kg. in each 100 kg. of feed
Poultry	250-500 gm./ 100 kg. of feed
Fishries	1-2 kg/ 100 kg. of feed

Or as directed by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

Presentation :1 kg & 5 Kg

Highly effective in nature

Reaction free

Accurate formulation

**Chelated Vit-Min 4Vet** prevents various deficiencies in animals. The supplement guarantees improved growth in various aspects of the animals, such as bone development, skin quality, enzyme functions, and general health. The trace minerals are only required in smaller quantities, but their deficiency will directly affect the metabolic functioning of animals. Organic compounds are greatly useful in improving health and beneficial for animals.

**Chelated Vit-Min 4Vet** increased milk production in dairy animals. During lactation, the increased demand for nutrition is met with the inclusion of health supplements. It improves the health of the calves, making them more active and fertile. When the health of the calves is improved right from the early stages, they can grow into healthy adults with ample milk production. **Chelated Vit-Min 4Vet** combination increases fat in animals, making growers in poultry healthy.

## BENEFITS

- Increases milk production
- Increases fat and SNF in cattle
- Improves reproductive health and fertility rate
- Boosts the immune system of young animals and calves
- Boosts growth in all animals

# Herzyme

POWDER

A Next Generation Complete Herbal Enzyme for Anorexia, Indigestion & Liver dysfunctions for Livestock & Poultry

## Composition :

Each 100 gm. Contains :

Pueraria tuberosa	10 gm.
Hemidesmus indica	5 gm.
Phyllanthus niruri	10 gm.
Terminalia chebula	5 gm.
Andrographis paniculata	15 gm.
Trachyspermum ammi	4 gm.
Pimpinella anisum	4 gm.
Zingiber officinale	2 gm.
Leptadenia reticulata	5 gm.
Boerhavia diffusa	4 gm.
Eclipta alba	5 gm.
Sindhav salt	14 gm.
Beed Lavan	5 gm.
Excipients	q.s.

## Usage & Administration :

Cow, Horse & Buffalo  
20-25 gm. twice a day with feed.  
Camel :  
30-40 gm twice daily  
Calf, Foal, Goat, Sheep & Dog  
10 gm. twice a day with feed.

Poultry & Fish  
1 kg / ton of feed.

Or as directed by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

Accurate formulation

**Herzyme powder** contains Plant-Based Digestive Enzymes, which is an all-natural combination of essential herbs in a palatable powder. It is prevention of digestive disorders like Anorexia, Dyspepsia, Constipation etc.

**Herzyme powder** stimulates appetite. Improve milk production in dairy animals and improve egg production in poultry.

It is Boost up the formation of digestive enzymes and improve digestive and liver function. **Herzyme powder** Increases resistance power in animals against bacterial & viral attacks and regulates the ruminant pH & restore the ruminant movement.

It is also faster recovery from illness and debility Indicated in disturbance of GI tract, diarrhoea acidosis, tympany & impaction.

## Indications :

- Stimulate appetite.
- Boost up digestive & liver functions.
- Increase the formation of digestive enzymes.
- Increase resistance against bacterial & viral attacks.
- Improve milk production.
- Regulates the ruminal pH & restore the ruminal movement.
- Improve egg production in poultry

# Heatvan

Heat inducer Bolus

for Better  
**Reproductive Performance**  
in Cattle & Buffalo

## Composition :

Each Bolus Contains:

Vitamin E	100 mg
Vitamin K	180 mg
Chelated Copper	200 mg
Ferrous Sulphate	14 mg
Chelated Cobalt	18 mg
Selenium	10 mg
Chelated Zinc	4 mg
Gajar Beej	715 mg
Kalongi	715 mg
Shivlingi	178 mg
Balent Shepa	715 mg
Pandhari Mohari	177 mg

## INDICATIONS :

- Anoestrus • Silent Heat
- Delayed Sexual Maturity
- Repeat Breeding

## USAGE :

Cow, Buffaloes & Mares :  
1 Bolus Daily For 10 Days

Or as directed by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

## Presentation :

2 Bolus Strip Box

Highly effective in nature

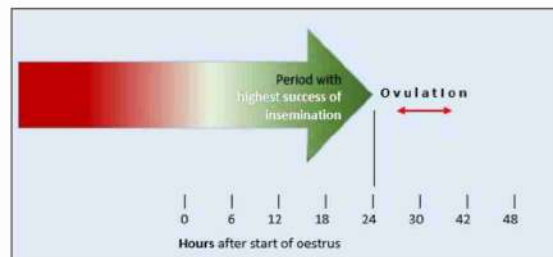

Reaction free

Accurate formulation

Anoestrus in cattle is defined as the absence of proper estrus cycle or heat cycle which may be represented as either absence of sign of estrus or there may be the presence of the luteal cyst. There are various factors affecting the estrus cycle of cow or buffalo as Manage mental, Nutritional, Breeding, and Hormonal changes. Now as per various studies the majority of animals are showing anoestrus due to Manage mental or Nutritional deficiencies. So we can say that balanced nutrition is one of the cattle fertility factors which is highly essential to be maintained by the dairy farmers to overcome the negative effects of improper nutrition or imbalanced diet given to animals.

This heat inducer supplement is tried as cattle breeding products on the number of animals at the field level or at various farms and it is seen that these boluses have given the best result in the case of heifers and postpartum anoestrus condition.

Pre-oestrus	Oestrus	Post-oestrus
<b>Agitation:</b> <ul style="list-style-type: none"><li>• Loss of appetite</li><li>• Smelling</li><li>• Mounting attempts</li><li>• Milk retention</li></ul> 	<b>Standing:</b> <ul style="list-style-type: none"><li>• Allows mounting</li><li>• «Stands»</li><li>• Fixed gaze</li><li>• Roaring</li></ul> 	<b>Calm:</b> <ul style="list-style-type: none"><li>• No longer standing</li><li>• Normal behaviour</li></ul> 

## Features :

Made of High-Quality Vitamins and Minerals  
Bring Animals in Heat  
Result and Quality oriented Animal Food Supplement

## ACTIONS :

- Helps In Progesterone Production which prevent Repeat Breeding naturally.
- Corrects Mineral & Vitamin Deficiency.
- Helps In Inducing Stronger Heat And Improves Follicle Quality.
- Improves Conception Rate And Control Early Embryonic Death.
- Boost up growth Of Genital Organ In Heifer.
- Reduce Inflammatory Condition Of Genitalia Like Metritis, Endometritis Etc.

Accurate formulation

Worm infestation is one of the major problems in animals. Mainly animals infested with worms from an early age. Infield conditions, worms are mostly found in animals showing symptoms as decreased growth even on proper feed, decreased milk production even in healthy conditions, anorexia, indigestion, etc.

Calves show emaciation or bloat-like symptoms. Anestrus and repeat breeding are major problems of animals that are even related to worms. Now the dairy farmer is even quite aware of dewormers as chemical dewormers containing albendazole, fenbendazole or oxfendazole, etc. salts but with continuous use of these animals are now adapted and are completely nonresponsive to these dewormers. So to find the proper solution of worms with minor or no adaptability in animals Vandana Biotech has shown the 1st step in launching herbal dewormer bolus which is safe in nonpregnant, pregnant, and lactating animals.

**BENEFITS:-**

- Highly effective to expel worms as compared to chemical dewormers.
- Safe in pregnancy
- Does not destroy ruminal microflora
- Expel worms and improves fertility.

**Kit : 250 ml Sol.+259 ml Liq.**

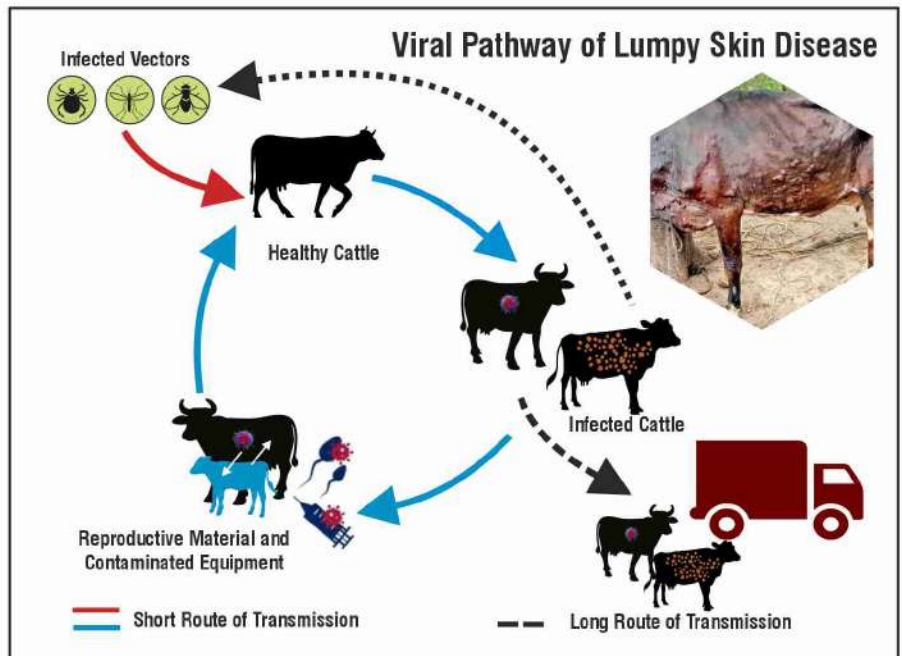

Highly effective in nature

Reaction free

Accurate formulation

Lumpy skin disease is a viral disease that affects cattle. It is transmitted by blood-feeding insects, such as certain species of flies and mosquitoes, or ticks. It causes fever, nodules on the skin and can also lead to death.

Infected cattle develop fever, lacrimation, nasal discharge, and hyper salivation, followed by the characteristic eruptions on the skin and other parts of the body in ~50% of susceptible cattle. The incubation period is 4–14 days. The nodules are well circumscribed, round, slightly raised, firm, and painful and involve the entire cutis and the mucosa of the GI, respiratory, and genital tracts. Nodules may develop on the muzzle and within the nasal and buccal mucous membranes. The skin nodules contain a firm, creamy-gray or yellow mass of tissue. Regional lymph nodes are swollen, and edema develops in the udder, brisket, and legs.

**Indications:**

- Lumpy Disease
- All types of chronic wounds
- Pain, High Fever & Inflammation
- Nasal and Salivary secretions
- Swollen Lymph Gland
- Anorexia
- Pyometra
- Degnella
- Skin Disease
- Oedema & Otitis

## A Unique way to Conceive After A.I.

# CONCIV-AI

3rd Generation Formula with Omega-3 & Omega-6 Fatty Acids

Composition :  
Each 5 ml contains :

Omega-3 fatty acid	250 mg
Omega-6 fatty acid	250 mg
Vitamin A	12000 IU
Vitamin E	5000 IU
Copper	100 mg
Zinc	100 mg
Manganese	25 mg
Potassium	5 mg

Benefits :

- Improves uterine turgidity and helps in establishing pregnancy
- Improves uterine tone
- Improves Uterine contraction
- Improves motility of sperms and ovum
- Tones up the uterine lining for implantation
- Improves uterine health
- Reduces chances of uterine infections

**Recommendation :**

225 ml. to be administered orally  
with in 30 minuts after A.I.  
on the day of insemination

Or as directed by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

**Presentation : 225 ml**

**Highly effective in nature**

**Reaction free**

**Accurate formulation**

**CONCIV-AI** is a conception improver liquid feed supplement containing omega-3 and omega-6 fatty acids. As various studies have shown that fatty acids play an important role in increasing conception rates in cattle.

As in India, the major problem of their livestock is repeated breeding. Repeaters may lead to high economic loss to farmers as for when the animal repeat or do not conceive and again come in the heat after 21 days. This is one of the biggest losses to the farmer. So major demand in today's market is for products improving conception rates. So on the basis of market need we have found the solution to this repeat breeding problem via liquid feed supplement containing vitamins along with omega fatty acids.

### Advantages of Artificial Insemination of Cattle

AI makes it possible to increase the number of calves from a bull by dividing the semen for multiple services

AI helps in preventing the spread of contagious diseases of the genital organs

Dairy farmer does not need to maintain a herd sire and thus can avoid the expenditure on the management of a bull

Early detection of infertile bulls is possible through the use of AI technologies

# Ferromin

MALT

Iron tonic with  
chelated minerals & Vitamins

Each 100 gm contains :

By pass ferric ammonium citrate	750 mg
Chelated copper glycinate	250 mg
Chelated cobalt glycinate	3.75 mg
Calcium gluconate	900 mg
Biotin (Vitamin H)	187.5 mcg
Folic acid	3.75 mg
Vitamin B1	10 mg
Vitamin B2	25 mg
Vitamin B5	2.5 mg
Vitamin B6	20 mg
Vitamin B12	37.5 mcg
Vitamin E	10 IU
Vitamin D3	9000 IU
Niacinamide	112.5 mg
Malt extract	11.3 gm
Propylene glycol	10%
Dextrose monohydrate	30%
Carbohydrate	qs

**Recommended Usage:**

Cattle, Buffalo & Horse : 30-50 ml daily  
Calves, Sheep & Goats : 10-15 ml daily  
Camel : 10 ml/100 kg of body weight daily  
Growers : 5-10 ml daily / 100 birds  
Or as directed by the veterinarian.

Appropriate overages of vitamins added to compensate for loss of storage.  
Keep bottle tightly closed.

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 450gm & 1 KG

Highly effective in nature

Reaction free

Accurate formulation

Iron Is an Essential Component of Ruminant Body. Young Animal on Milk Diet May Suffers from Iron Deficiency. Continuous Loss of Blood May Leads to Iron Deficiency. Sufficient Iron Is Essential for Calves as It Is Required for Various Physical Processes Especially in the production of "Hb" in Muscle where it binds to Oxygen and Transport it to Body. Iron has also the role in the production of antibiotics in the body.

So It Is Also Essential for Calf Resistance or Calf Immunity. It is Found That Calves Receiving Milk Replacers during life have more iron in the body than those fed on Mothers Milk.

**Ferromin** especially Recommended in Surra and Red Water Disease in Cattle. Surra is Caused by Trypanosoma, Protozoa Transferred by the "Tabanu Flies" Decreases Rbc and Hb Leading to Loss of Appetite, Weight Loss, Anaemia, Oedema, Abortion, etc. So an Iron Deficiency Seen Due to Loss of Blood in Surra and Re-Ferrol is Found to Be Highly Effective Here to Recover Hb Levels.

**Iron Deficiency in Cattle Characterised By:-**

During & after pregnancy, General weakness, Due to parasitic infestation, Loss of Appetite, Poor Growth, Lethargy Mainly Seen in Preserved Calves Especially on Milk. So to Overcome All There Problem. We have Launched **Ferromin** as an Iron Tonic for Cattle, Calves, Poultry & Piglets as Piglets Suffer Very Commonly from "Anemia"

**A Mile Stone in the  
management of Mastitis...**

# Mastivan

POWDER

**HEALTHY UDDER...  
MAXIMUM OUTPUT**

**COMPOSITION:**

Each 60 grams contains:

Trisodium citrate	2500 mg.
Vitamin A	10000 I.U.
Vitamin D3	2000 I.U.
Vitamin E	800 mg.
Vitamin H	20 mg.
Vitamin K	20 mg.
Selenium	4 mg.
Potassium iodide	4 gm.
Copper sulphate	960 mg.
Cobalt sulphate	40 mg.
Zinc sulphate	825 mg.
Manganese sulphate	3000 mg.
Lactic acid bacillus	200 million CFU
Live yeast 50000	million CFU
Serratiapeptidase	32 mg.
Bromelain	320 mg.
Methionine	1500 mg.
L-lysine	3000 mg.

**Usage & Administration :**

Cattle & Buffalo : 30 gm. twice daily 3-5 days  
or As directed by the Veterinarian.

**Advantages :**

- Reduce inflammation & pain
- Minimize the bacterial load in udder
- Helps in regeneration of udder tissues
- Helps in maintain immunity
- Helps in faster & complete recovery
- Unique Milk conditioner

Animal Feed Supplement

Not for Medicinal / Human use

**Presentation : 60 gm**

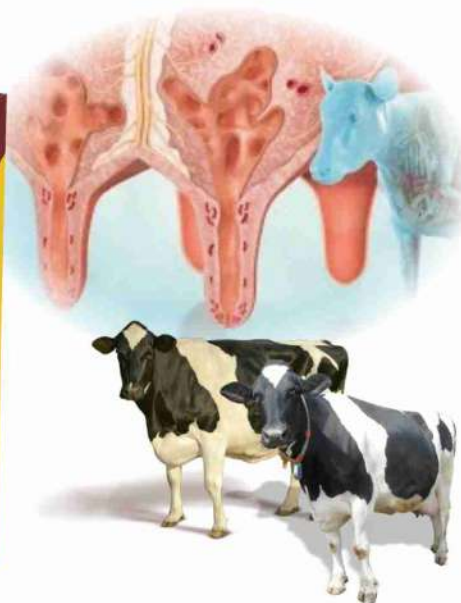

Highly effective in nature

Reaction free

Accurate formulation

Mastitis is an infectious disease condition resulting in an inflammatory reaction in the mammary gland of the cow. It is the most common disease in dairy cattle characterized by various degrees of severity - ranging from a mild disease with no gross changes in the secretion (milk) but an increase in inflammatory cells (somatic cells) in the milk, to a moderate disease with an increase in inflammatory cells and gross changes in the milk. It may be accompanied by signs of inflammation in the mammary gland including swelling, redness, and painfulness. Mastitis may progress to a severe disease with all of the above changes in the milk and systemic signs including fever, depression, and "off-feed" and occasionally even death in the most severe cases. Mastitis reduces milk production and milk quality.

**Mastivan Powder** was specially formulated for Cattle to give the safest and side-effect-free supplement,, keeping in mind the Efficacy and Quality of the product.

**Mode of action :**

In acute mastitis, **Mastivan** gives the best results even when used along with the other line of treatment like antibiotics and intramammary infusions.

Even when antibiotics therapy fails to relieve the inflammation, **Mastivan** works efficiently and protects the teats.

**Mastivan** is helpful in both acute and sub-acute mastitis and even improves fibrosis of teats or when the udder becomes hard as stone.

**Mastivan** dissolves the fibrosis that occurs due to mastitis and brings back the normal texture of udder and teats.

**Mastivan** facilitates the normal physiological function of the mammary glands.

**Mastivan** saves the teats from becoming hard, cracked, and funnel shaped.

**Uterine prolapse is an uncommon complication of parturition in the cow ...**

# PROSAFE-V

Powder

**Help in the Proper Involution of Uterus and Vagina...**

**Composition:**

Each 100 gm contains:

Acacia catechu	5%
Nardostachys jatamansi	10%
Mesua ferrea	5%
Rubia cordifolia	5%
Pistacia integerrim	5%
Aegle marmelos	10%
Boerhavia diffusa	10%
Vitex megundo	10%
Saraca adoca	30%
Tinospora cordifolia	10%

Fortified with Vitamins & Minerals

**Usage & Administration :**

Cow, Buffalo & Mare : 50 gm. of powder twice a day should be given with 250 gm. of butter/ghee/water for 3 days.

Sheep, Goats & Bitch : 25 gm. of powder twice a day should be given with 125 gm. of Butter/ghee/water for 3 days.

**Advantages:**

- Helps in the proper involution uterus and vagina to its anatomical position.
- Increase uterine muscle tone and strengthen uterus thus reduces the chances of reoccurrence.
- Helps to reduce inflamed prolapsed parts to it's normal size when applied topically.
- Effective in both prepartum and post partum prolapse.
- Safe for pregnant uterus.

**Animal Feed Supplement**

**Not for Medicinal / Human use**

**Presentation : 500 gm & 1 Kg**

**Highly effective in nature**

**Reaction free**

**Accurate formulation**

The vaginal prolapse is more common and looks like a pink mass of tissue about the size of a large grapefruit or volleyball. Prolapse of the uterus is a larger, longer mass, deeper red and covered with the "buttons" on which the placenta attached. Prolapse is a temporary displacement of the organ or its part which is usually exposed to the exterior from their position. Prolapse of the cervix and vagina is a disorder of cattle and buffalo in late gestation. This condition is more serious in dairy cattle because of the mishandling, especially of the digestive and genital tract. Prolapse of vagina usually involves a prolapse of the floor, the lateral wall and a portion of the roof of the vagina through vulva with cervix and frequently the entire vagina and cervix are prolapsed through the vulva.

**Prosafe-V Powder** useful for partial prolapse of uterus and vaginal problems. It is manufacturing under the expert veterinarian Research and development (R&D) Team.

**There are mainly two types of prolapse:**

- Vaginal Prolapse
- Uterine Prolapse

**Vaginal Prolapse:**

This will typically occur before calving, usually in the heavy pregnant cow. In some of the cases prolapsed can occur directly after cow calves. A common cause is the pressure and weight of a large uterus in late pregnancy.

**Uterine Prolapse:**

This occurs immediately or after a few hours of calving. The uterus is completely dropped outside and will hang along the back of hind legs when the cow is standing. It's a life-threatening condition for a cow and the uterus must be placed back to its original position within the abdomen as soon as possible. A cow can die from blood loss if the prolapse isn't taken care of at its proper time.

Accurate formulation

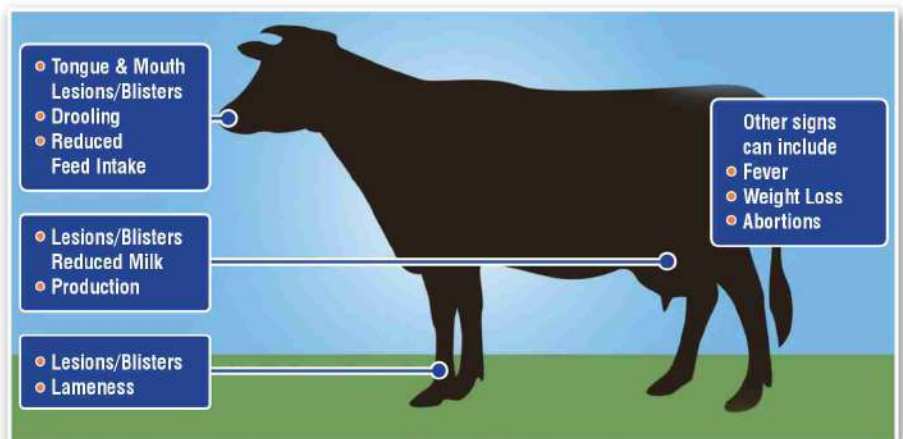

Foot and mouth disease (FMD) is a severe, highly contagious viral disease of livestock that has a significant economic impact. The disease affects cattle, swine, sheep, goats and other cloven-hoofed ruminants. It is a transboundary animal disease (TAD) that deeply affect the production of livestock and disrupting regional and international trade in animals and animal products. The disease is estimated to circulate in 77% of the global livestock population, in Africa, the Middle East and Asia.

**Mode of Action :**

**FMD MUKT** Cures mouth lesions in just 24 hrs. & animal starts grazing. The salivation is reduced to a very considerable quantity and recovery starts within 24 hrs.

The diarrhoea, fever and other FMD complaints The foot lesions also starts to dry up.

Prevents exogenous growth in between foot pads. All types of wounds like FMD lesions, Degnala disease. Surgical wounds, Inflammatory conditions like Mastitis & Metritis

- Pyometra • Metritis • Degnalla • Oedema
- Loss of Hair • Otitis
- Urinary Tract Infections • Pain & Inflammation
- Foot & Mouth Diseases • All type Chronic Wounds
- Supportive in Bacterial, Viral, Fungal Diseases
- Supportive in Reproductive Performance & Milk Production

Enriched with aloe vera

# Gasoban

Suspension

Nutritional supplement for  
Acidity & Gas Problems

## COMPOSITION :

Each ml Contains :

Aloe vera Extracts	0.50 ml
Sodium Thiosulphate	10 mg
Milk of Magnesia	0.125 ml
Sodium Sulphate	5 mg
Ginger Extract	0.25 ml
Fenugreek Extract	0.125 ml
Magnesium Carbonate	4.5 mg
Flax Seed Oil	0.30 ml
Simethicone	200 mg
Osmotic Laxative	qs

## Directions for use :

Adult Cattle, Buffalo, Horse & Camel  
2.5 ml / kg body wt.  
Calf, Sheep & Goat : 1ml/kg body wt.  
Dog & Cat : 0.5-1 ml/kg body wt.  
Repeat dose after 12 hours  
or as directed by the veterinarian

## Benefits :

- Helps to treat ulcer disease
- Normalising acid levels in the stomach.
- Strengthens the immune system
- Facilitates the absorption of water
- Helps to break down impacted food.

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 500 ml & 1litre

Highly effective in nature

Reaction free

Accurate formulation

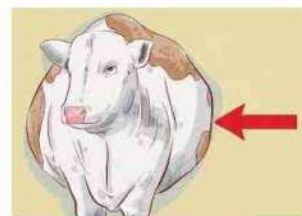

The impact of rumen acidosis on long-term health of dairy cows. Minimize susceptibility to rumen acidosis by reducing off-feed events.

Gas & acidity is a form of indigestion marked by excessive accumulation of gas in the rumen. Immediately after cattle consume a meal, the digestive process creates gases in the rumen. Most of the gases are eliminated by eructation (belching).

Trapped gases that are not eructated (belched) may form a foam or froth in the rumen that further prevents elimination of gases. Froth can be formed by many factors resulting from interactions among the animal.

**Gasoban** is a 3rd generation formulation enriched with Aloe vera is the best remedy for gassy bloat. This product is very pocket-friendly and easy to use.

## Benefits of Aloe Vera:

- Helps treat ulcer disease - normalizing acid levels in the stomach.
- Forms a lining throughout the colon to keep toxic waste from entering the body.
- Strengthens the immune system - Forms a barrier against microbial invasion [viruses].
- Facilitates the absorption of water, electrolytes and nutrition in the digestive system.
- Provides the raw material critical for lubrication of the joints.
- Has natural healing and detoxifying powers and works gently with the digestive tract to help break down impacted food.
- Helps sore and stressed muscles recover faster in working horses.

# BLOTOWIN

Liquid

## Herbal Anti bloat Oral Emulsion

### Composition:

Each 100 ml. Contains	
Trachyspermum ammi	5 gms.
Plumbago zeylanica	5 gms.
Acorus calamus	5 gms.
Zingiber officinalis	2 gms.
Operculina turpethum	3 gms.
Terminalia chebula	3 gms.
Arachis oil	5 ml.
Saussurea lappa	5 gms.
Embelia ribes	3 gms.
Swertia Chirayita	1 gm.
Mentha Spicata	5 gms.
Ferula Narthex	50 mg.
Excipients	q.s.

### Usage & Administration :

Cows, Buffaloes & Horses	: 100 ml. at a time
Calves, Colts & Heifers	: 50 ml. at a time
Pigs, Sheep & Goats	: 25 ml. at a time

### Administration :

Administer one or full dose orally/intra ruminally and repeat if necessary or as directed by the veterinarian.

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 500 ml & 1litre

Highly effective in nature

Reaction free

Accurate formulation

Nutritional disorders outlined in this publication include bloat, acidosis, and hardware disease.

Bloat is abnormal distention of rumen and reticulatum caused by excessive accumulation of gases of fermentation which either mixed with ingesta or as a free gas separated by ingesta. Bloat is simply building up gas in the Rumen. The nature of digestion process in cattle create the production of large quantities of gases like carbon dioxide and methane in rumen. Gas production is normal process as a result of fermentation in rumen. The gas is usually discharged or released through eructation (Belching). However, if the cattle is unable to remove excess gas, the pressure build up in rumen-reticulatum creating more pressure on diaphragm and bloat occurs.

**Blotowin** a unique combination of essential herbs. It's relieves from indigestion, Bloat, gastritis, abdominal condition in a better way. Veterinary Experts formulated and tested to treat root cause of bloat.

### Advantages :

- Control fermentation and excessive formation of gas.
- Accelerates the ruminal movement.
- Helps to overcome acid indigestion and maintains normal ruminal pH.

## Emergency Toxin Removal

# Toxvan-L

Activated Charcoal with Osmotic Laxative  
Suspension

### Composition :

#### Each ml contains :

Activated Charcoal	500 mg
Osmotic Laxative	500 mg
Simethicon	500 mg
Metamucil	500 mg
Excipients	qs

### Directions for use :

Adult Cattle, Buffalo, Horse & Camel  
0.25-0.5 ml / kg body wt.  
Calf, Sheep & Goat : 1ml/kg body wt.  
Dog & Cat : 1-2 ml/kg body wt.  
Repeat dose after 12 hours  
or as directed by the veterinarian

### Indications :

- Impaction • Poisoning
- Bloat & Tympany • Parasitic toximia
- Stomach discomfort • Indigestion
- Digestive cleanse • Acidosis

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 500 ml & 1litre

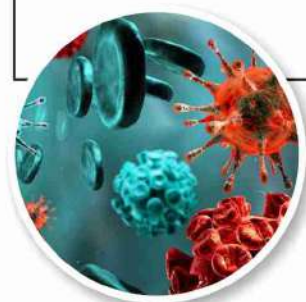

Highly effective in nature

Reaction free

Accurate formulation

Activated charcoal adsorbs many chemicals and drugs in the upper GI tract thereby preventing or reducing their absorption. The efficacy of activated charcoal depends on how quickly it is given and the poisonous substance swallowed. The sooner activated charcoal is given after a drug or chemical is swallowed, the better it works. Activated charcoal can be given to birds orally .

**Toxa-L** is a high quality activated charcoal with osmotic laxative used in animal feeds as an antidote for poisoning and to control diarrhea - e.g. as a result of food poisoning. Added side benefit is its ability to help control animal odors. as a result of food poisoning. It is able to adsorb numerous harmful or undesirable substances that may be present in the gastro-intestinal tract.

### Protection against....

- Food Poisoning
- Gastric Problems
- Mycotoxin

### Mechanism of Action :

- It will bind to other drugs and prevent their absorption from the intestine.
- It may reduce the absorption of a poison by as much as 75%.
- Help to treat a drug overdose or a poisoning
- Absorb many toxins from water borne organism or toxins from decomposing feed.
- Helps rid the body of unwanted substances
- Safe during pregnancy & lactation
- Reduces acid reflux, mitigates excessive protein in an imbalanced diet.
- Improve4s overall gut health of animal

# CALVAN GOLD

A unique combination of  
Calcium, Phosphorus, Vitamins & Minerals

*Enriched with Satavari*

## Composition :

Each 100 ml contains:

Vitamin A	45000 I.U
Vitamin D3	8000 I.U
Vitamin B12	100 mcg
Vitamin E	50 mg
Vitamin H	100 mcg
Calcium	1628 mg
Phosphorus	838.5 mg
Leptadania	800 mg
L-Lysine	250 mg
Colour : Erithrosine	
In flavoure base	

## DIRECTION FOR USE :

Cow, Buffalo & Horses	: 100 ml daily
Calves, Foal & Pig	: 40 ml daily
Sheep, Goat & Dog	: 20 ml. daily
<b>Poultry :</b> (Each 100 birds)	
Chicks	: 10 ml daily
Growers	: 30 ml daily
Layers/Breeders	: 50 ml daily

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 1, 2, 5 & 20 litre

Highly effective in nature

Reaction free

Accurate formulation

Giving birth is no simple task. This is true for nearly all species, including cattle. Bringing new life into this world is a miracle, but behind the awe and beauty is a mother who struggled for hours, giving her all.

While it is important to properly care for a newborn calf, it is also important to ensure the mother receives the care she needs as well. Giving birth takes a lot out of a cow – including calcium.

Proper calcium levels in a cow are crucial, especially post-calving. During the transition period, cows can need 4-10 times more calcium to finish developing a calf,

**CALVAN GOLD** is a Chelated Calcium acts as a Growth Promoter. It helps to Increase Milk Production, Fat Percentage & SNF in Milk. It also Helps in Reducing Calcium, Phosphorus & Minerals Deficiency in Animals. Its an ideal feed supplement for Cow, Buffalo, Calf, Goat & Horse.

## Mechanism of Action :

Calcium level regulation occurs via several signaling molecules, including parathyroid hormone (PTH), vitamin D, and calcitonin. Calcium is critical for many physiologic functions. Calcium is a major component of the bone matrix and teeth.

## BENEFITS :

- Increase milk production and quality.
- Strong formation of bones
- Maintain peak production for longer time.
- Prevents milk fever and ketosis.
- Helps in weight gain of eggs
- Reduces egg shell breakage during early peak and advanced laying period.

Accurate formulation

Calcium is a vital element Liquid Calcium for Poultry. In Poultry Birds calcium is required for good egg shell, immunity as well as during stress conditions. As poultry birds especially hatching birds or layers where their calcium plays a vital role in the development of egg shells. while in the case of broilers growth rate of broilers depends on calcium composition in the diet.

As we know Calcium For chicken egg shell is made up of 94% calcium carbonate. But as in today's diet chicken are not getting enough calcium in the diet. So they need an external source of calcium as a calcium supplement. Otherwise, calcium deficiency symptoms may appear. So to keep your hens healthy and their eggs strong a well-balanced diet is required which also contains calcium supplement sources.

**CALVAN CLEAR** one of the best supplement ever for poultry as it's unique composition is well balanced as per requirements of poultry birds.

## ADVANTAGES :

- Provides more bio-availability of calcium during hypocalcaemia
- Prevents from anemia
- Increases egg quality and thickness of shell
- Useful in leg weakness & strong the bones
- Curing from osteoporosis and Osteomalacia
- Prevents general weakness & debility

## Bolus

A Unique combination of Tribasic Calcium Phosphate, Minerals, Vitamins, Amino Acids, Milk Boosting Herbs and Probiotics

### Each Bolus Contains

Tribasic calcium phosphate	7.2 gm.
Vitamin A	45,000 I.U.
Vitamin B12	100 mcg.
Vitamin D3	12,000 I.U.
Vitamin E	25 mg.
Vitamin H	100 mcg.
Lysine	125 mg.
Magnesium	20 mg.
Herbal Probiotic mix	1,000 mg.
Leptadenia Reticulata	350 mg.
Asparagus recemosus	2,000 mg.
Excipients	q.s.

### Usage :

Large animals : 1 Bolus twice daily  
Small animals : ½ Bolus twice daily  
Double the dose in heavy calcium deficiency

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 5 strip X 4 bolus

Highly effective in nature

Reaction free

Accurate formulation

Proper calcium levels in a cow are crucial, especially post-calving. During the transition period, cows can need 4-10 times more calcium to finish developing a calf, produce colostrum and begin milk production. This drastic increase in calcium demand within a short period of time can cause calcium deficiency and lead to hypocalcemia (aka milk fever). Hypocalcemia can lead to increased injury, decreased feed intake, increased risk of ketosis, increased risk of displaced abomasum and lower milk production. Therefore, preventative measures should be taken to reduce the possibility of hypocalcemia.

**Milkovan** bolus a uniquely formulated bolus used to promote adequate calcium levels in transition cows. The formulation allows for two boluses (one dose) to be given immediately at freshening. Administering two boluses consecutively and not having to catch the cow 12 hours later means less stress on the cow and less stress for you .

### Advantages:

- Improves milk production.
- Stimulates process of lactation to produce more milk.
- Increases percentage of milk fat.
- Stimulates physiological process of lactation.
- Increases the vascularity of entire mammary system.
- Ensures smooth and complete let down of milk.
- Useful in mastitis.

Accurate formulation

Calcium phosphate (tricalcium phosphate) is a mineral that is used as a supplement in animals who do not get enough calcium from feed. Calcium phosphate is used to treat calcium deficiencies that may be associated with low blood calcium, a parathyroid disorder, or osteoporosis and other bone conditions.

Calvan Forte Bolus, a revolutionary bolus which improves the health of the animals by increasing milk production, ensuring letdown of milk, increasing lactation period, improving udder health, and increasing fat percentage in milk.

When the animal gives less milk or milk with diminishing vitamin values, it is a matter of concern and needs for veterinary products arise to bring back the nutritional values in the animals.

Shatavari is well acclaimed for its adaptogenic, antioxidant, antimicrobial, immunostimulatory properties and have stimulatory role in growth, reproduction, milk yield and composition of livestock

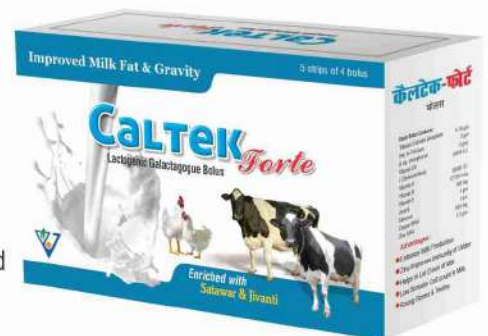

Jivanti is well acclaimed increasing milk yields, increasing thickness of milk, easy let down of milk and regulating of heat periods in female animal

### Advantages :

- Enhance Milk Production.
- Zinc Improves Immunity of Udder
- Helps in Let Down of Milk.
- Low Somatic Cell count in Milk.
- Strong Bones & Teeth
- Improves Involution of Uterus
- Helps in shortening of the intercalving period
- Improves Fertility & growth
- Keeps animal healthy
- Ideal Supportive Supplement in Mastitis

3rd Generation Heat Inducer

# PREGO Vet

Bolus For all Fertility Factors

Each uncoated bolus contains :

Beta Carotene	500 mg
Chelated Zinc	350 mg
Chelated Copper	500 mg
Chelated Manganese	200 mg
Chelated Chromium	16 mg
Cobalt	60 mg
Iron	1500 mg
Iodine	140 mg
Selenium	6 mg
Vitamin E	20 mg
Saccharomyces Cerevisiae	10X10 <sup>9</sup> CFU

#### Directions for use :

Large animals :

To improve heat :

1 bolus daily orally for 21 days

During the cycle.

To improve conception rate :

1 bolus daily orally for 7 days

before and after AI

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 7 Boli Pack

Highly effective in nature

Reaction free

Accurate formulation

Anoestrus in cattle is defined as the absence of proper estrus cycle or heat cycle which may be represented as either absence of sign of estrus or there may be the presence of the luteal cyst. There are various factors affecting the estrus cycle of cow or buffalo as Manage mental, Nutritional, Breeding, and Hormonal changes. Now as per various studies the majority of animals are showing anoestrus due to Manage mental or Nutritional deficiencies.

The animal may undergo anoestrus condition where animals do not show signs of estrus and it is one of the major loss to farmers economy as with this farmer may suffer the full seasonal loss of his animals earning which may be from milk obtained from the animal especially in case of heifer anoestrus running for long period leads to major economic loss.

The aim of our fertility bolus **Pregavet** is to support the preparation of the cow for oestrus and reproduction.

#### Features :

Prego Vet Bolus is Made of High-Quality Vitamins and Minerals

Prego Vet Bolus to Bring Animals in Heat

Result and Quality oriented Animal Food Supplement

#### Indications :

- Infertility
- Anoestrus
- Silent heat
- Delayed ovulation
- In Repeat Breeding
- Improved synthesis of reproductive hormones

PREPARE ANIMALS BEFORE CALVING WITH..

# MINOBOLITE

Complete Nutrition for Pregnant Animals

Enriched with  
specific Gluconeogenic precursor  
Selected organic minerals &  
Rumen protected vitamins

Nutritional Supplement of Essential Glucogenic precursor, fortified with vitamins & minerals for pregnant animals.

Feeding Schedule :

Cattle & Buffalo :

1 sachet in Morning & 1 sachet Evening  
for 20 days regularly.

Or as directed by the veterinarian

Feeding Advice:

Cattle & Buffalo:

Feed one 50 gm sachet of Minobolite  
in the morning and one sachet in the  
evening for 20 days during last month  
of pregnancy

Animal Feed Supplement

Not for Medicinal / Human use

Presentation :

20 sachets of Minobolite  
50 gm in a HDPE container

Highly effective in nature

Reaction free

Accurate formulation

Enriched with  
Biotin (Vit.H)

Enhancing milk production in animals  
effected with milk fever during previous lactation

Advantage :

Regular feeding of Minobolite ....

Helps to mobilize Calcium & Phosphorus

Avoid chances of hypocalcemia

Helps in smooth calving

Vitamin H help to development of udder

Reduces chances of ROP

Mineral nutrition is the magic bullet for reproductive success in your beef operation? The number of mineral products for sale may give the impression that the answer is yes. However, in reality, mineral nutrition is just a part of a good nutrition and management plan. First, protein and energy requirements must be met. A good mineral program can't make up for a lack of protein and energy and low body condition scores in the herd. Once protein and energy requirements have been met, then a complete mineral supplementation program is next. The mineral supplement should be formulated to match regional forage and water resources.

**Minonolite Powder** an unique combination vitamin & minerals fortified with essential Glucogenic precursor significantly, a more positive energy balance for pregnant cows.

Right answer to multiple causes of  
**Rumen Dysfunctions....**

# Amysacc

Bolus

Restart Rumen Activity smoothly

**Composition :**

Each uncoated Bolus contains :

Amylase	2000 FCCU
Cellulase	5000 CMCU
Xylanase	2000 FCCU
Pectinase	500 FCCU
Ginger	100 mg
DL Methionine	100 mg
L-Lysine	170 mg
Leucine	10 mg
Valline	5 mg
Threonine	5 mg
Lactobacillus Acidophilus	1.5x10 <sup>6</sup> CFU
Lactobacillus Sporogenes	2.0x10 <sup>8</sup> CFU
Saccharomyces Boulardii	1x10 <sup>8</sup> CFU
Aspergillus Oryzae	1x10 <sup>7</sup> CFU
Magnesium Trisilicate	300 mg
Niacinamide	500 mg
Biotin	10 mg
Soyabean Meal	q.s.

**Usage:**

Cattle & Buffalo : 2-4 bolus for 3-5 days  
or As directed by the veterinarian.

Animal Feed Supplement

Not for Medicinal / Human use

**Presentation : 1X4X2's Bolus**

Highly effective in nature

Reaction free

Accurate formulation

Almost any dietary factor that can alter the intraruminal environment can cause simple indigestion. Simple indigestion is common in hand-fed dairy and beef cattle because of variability in the quality and quantity of their feed. Dairy cattle may gorge excessive quantities of highly palatable feeds such as corn or grass silage; beef cattle may eat excessive quantities of relatively indigestible, poor-quality roughage during winter. Indigestion can result from suddenly changing the feed, using spoiled or frozen feeds.

Ruminal disorder is one of the major threats to the health and welfare of animals worldwide. The most common ruminal disorders/dysfunctions are usually defined as indigestion.

**Amysacc Bolus** right answer to multiple causes of Rumen dysfunctions.

**Advantages :**

- Helps in Better Secretions of Saliva and Digestive Juices for Effective Digestion of Food.
- Optimizes Ruminal PH
- Maintains Perfect microflora in the Rumen for Better Digestion.
- Better Feed Utilization by Better Enzymatic Activity

Small Animals : 1/2 bolus daily  
Or as direct by the veterinarian

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 2 X 4 bolus

Highly effective in nature

Reaction free

Accurate formulation

The **Vit-Min 4Vet** is a dietary feed, which supports dry cows during and around the dry period with trace elements and vitamins. This supports optimal fertility, a good start of lactation and optimal preparation for calving.

**Vit-Min4Vet** provides the daily requirement of iodine, copper, zinc, cobalt, manganese, selenium and vitamins by means of controlled release over a period of approximately 180 days.

**Vit-Min4Vet** is a slow-release cattle supplement designed to prevent a vitamin and mineral deficiency in cattle and improve the overall wellbeing of the cows. Insufficient (trace) minerals can result in losses in performance and can cause clinical deficiencies. More commonly though, subclinical deficiencies occur manifested as reduced pregnancy rates, rough hair coats, hoof issues, retained placenta, low libido and poor calf performance.

#### Benefits :

- Slow-release of the daily requirements in minerals during 6 months
- Different soils have different mineral content.
- A mineral bolus guarantees sufficient trace minerals for cattle
- Added vitamins
- No need for mixing minerals in feed or relying on your young cattle to use a licking block
- The building stone for a healthy cow and healthy future: higher resistance, healthy growth, and better fertility

Bolus

## Liver Boosting & Stimulating Bolus

### Each uncoated bolus contains :

DL-Methionine	40 mg
Cobalt chloride	0.80 mg
Copper sulphate	0.44 mg
Sodium phosphate (Dibasic dihydrate)	100 mg
Sodium bicarbonate	660 mg
Gentian powder	220 mg
Magnesium Erisilicate	1000 mg
Ginger powder	44 mg
Vitamin B1	145 mg
Niacinamide	165 mg
Dried yeast	700 mg
Dextrose	500 mg

### Usage :

As per directed by the veterinarian.

Animal Feed Supplement

Not for Medicinal / Human use

Presentation : 4 bolus X 5

Highly effective in nature

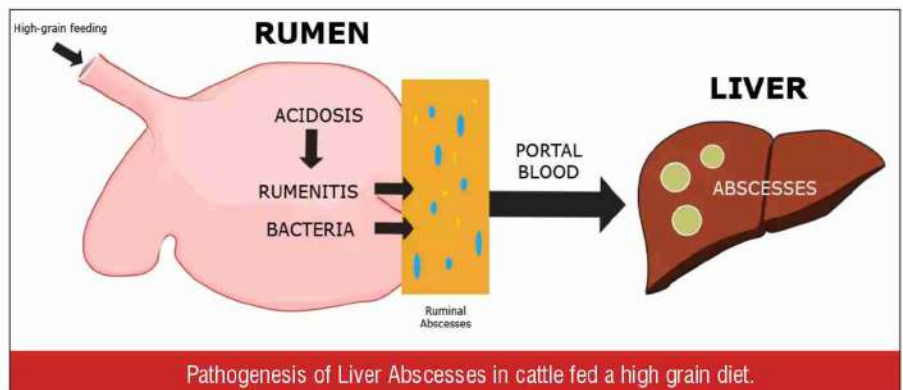

Reaction free

Accurate formulation

A healthy liver in a dairy cow serves many important functions:

Glucose production/synthesis, detoxification of ammonia and production of antibodies. Rumen microbes metabolize starches supplied by the feed ration into the volatile fatty acids, lactate and propionate, which are converted into glucose (fuel to run the body) via the liver. With onset of lactation, a cow's energy requirement is tripled. High demands for glucose are for both milk synthesis and also reproductive performance. A cow in early lactation producing 80 pounds of milk needs a supply of 6 lbs of glucose per day just for milk production.

**LEVOTUN BOLUS** for the liver functioning of large animals and free of chemicals. It is a unique combination of Vitamins, Minerals, Dry yeast & Zinger so giving the best result without any side effect.

### BENEFITS :

- Improves liver function & increases appetite.
- For better growth, production & vitality.
- Helps to restore liver functions.
- Liver fluke infestation in livestock and aflatoxicosis in poultry.
- Improves FCR in poultry.
- Increase weight gain & egg production in poultry.
- To counteract stress due to vaccination, Deworming, disease.

Layers	15-20 ml daily

Or as directed by the veterinarian.

Animal Feed Supplement

Not for Medicinal / Human use

**Presentation : 500 ml & 1litre**

Highly effective in nature

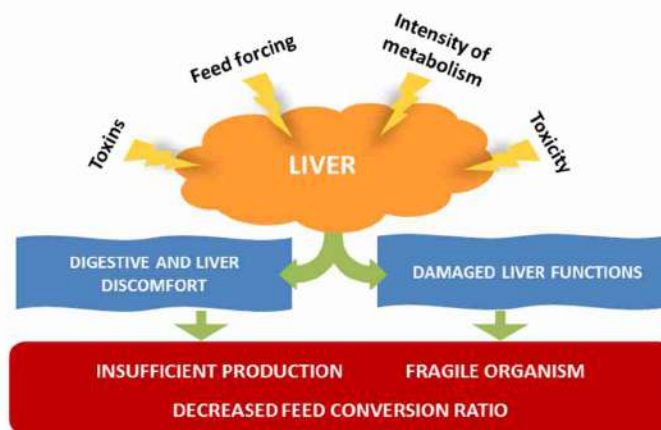

Reaction free

Accurate formulation

A healthy liver in a dairy cow serves many important functions: Glucose production/synthesis, detoxification of ammonia and production of antibodies. The liver acts as a blood cleanser, detoxifier and plays a pivotal role for the proper functioning of animal organism. If a liver begins functioning abnormally, what is the best course of action to take?

Decreased appetite, reduced feed intake, metritis, emergence of mastitis... an immediate approach to these issues often consists of using antibiotics or enriching the cow's diet.

LIVAN-DS is a excellent combination Tricholine citrate, Vitamin & Minerals so giving the best result without any side effect. These are accurately formulated using quality ingredients to ensure the effectiveness and enriched with power of Silymarin & Sarphunkha.

## INDICATIONS :

- Prevention of fatty liver
- Liver disorder of idiopathic origin
- Anorexia and debility
- Reduced feed intake
- Improve immunity, FCR & growth
- Stress of various etiology
- Along with dewormer & antibiotic therapy
- Protects the liver from the effect of toxins.
- It also increases milk production.

Also Available  
**LEVOTUN**

**Fishmin-C** refers to raising fish mainly for food. More than 50% of the seafood consumed by people worldwide comes from aqua culture. Fish that tastes good will always be preferred.

**Fishmin-C** provides a steady stream of income for Indian farmers. Over fishing depletes the natural resources of the ocean and fish farming provides the best solution to manufacture fish for human consumption. By maintaining adequate aquarium conditions, you can breed and raise healthy fish with minimal effort. Farmers can easily breed profitable fish like Tilapia in tanks even in a limited space. As with any farming, fish farming comes with its challenges.

**Fishmin-C** is the best fish feed concentrate designed to improve growth and promote the health of fish and aquaculture. The supplemental feed contains Vitamins & Minerals essential to maintain good gut health.

Composition: Each Kg Contains

Calcium	120 gm
Phosphorus	60 gm
Protein	100 gm
Fat	4000 mg
Vitamin A	50000 IU
Vitamin D3	5000 IU
