A Quality Products of :  
**Vandana**  
BIOTECH PVT. LTD.  
An ISO 9001: 2015 & GMP Certified Co.

## Animal, Poultry, Pet & Aqua Feed Supplement

**An ISO 9001:2015 & GMP Certified Co.**

We are leading company in **INDIA** for the manufacturing, exporting and supplying of Quality **Veterinary Products** for better **health, growth, reproduction** of livestock. We are considered as one of the leading Animal Feed Supplements and Veterinary Products Manufacturer.

In **Cattle, Poultry, Pet & Aqua** Feed Supplements field we have started with a small unit of just 6 to 7 veterinary products. Now a days with positive response from our valuable customers and their faith in our quality products, we are now dealing with huge no. of **cattle, poultry, Pet & Aqua** feed supplement products.

### **Vision :**

Our overall vision of "**Vandana Biotech**" is becoming a competitive, progressive company delivering quality products to our customer. Competitiveness is the ability for a company to generate greater business and retain more customers.

### **Mission :**

In "**Vandana Biotech**" our mission is to improve Animals Health and create a better life for them. To become the first choice of Customers in **Treatment, Productivity, Prevention & Diagnostic** field of animal health industry, through **Innovative Solution & Quality Services**.

### **Values :**

Throughout the years, "**Vandana Biotech**" has stood by a set of values that affect the way we work. We are a team. with good internal collaboration. We provide excellent services and fast response to our customers.

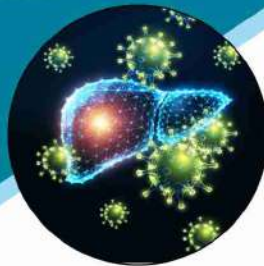

**Diversity:** Home has different definition to everyone, so we keep focus on worldwide trend and give our clients most suitable suggestions.

**Standard:** We see our customers not just a one time trade partner, but each of them are as a life long business associates. That's why we have our strict quality control on our products.

# Livan-P

Liquid

Liver Tonic Tricholine citrate  
enriched with Essential Herbs

#### Composition:

Each 10 ml contains	
Tricholine Citrate (60%)	1000 mg.
Silybum marianum	900 mg
Andrographis paniculata	000 mg
Ocimum sanctum	1500 mg
Solanum nigrum	1000 mg
Choline Chloride	300 mg
Protein Hydrolysate (55%)	100 mg
Liver Extract	500 mg
Yeast	25 mg
Methionine	30 mg
Inositol	30 mg
Vitamin B1	125 mg
Vitamin B2	200 mg
Biotin	50 mg
Vitamin C	50 mg
Vitamin B6	2 mg
Vitamin B12	25 mg
Manganese	8 mg
Zinc	5 mg
Niacinamide	200 mg

Base for fortified with predigested protein & amino nitrogen

#### Usage Instructions :

##### Each 100 birds

Chicks : 5-10 ml.

Broilers & Growers : 15-20 ml.

Layer : 25 ml.

or as directed by the veterinarian

Poultry Feed Supplement

Not for Medicinal / Human use

#### Presentation:

1litre, 5 litre, 20 litre & 30 litre

Highly effective in nature

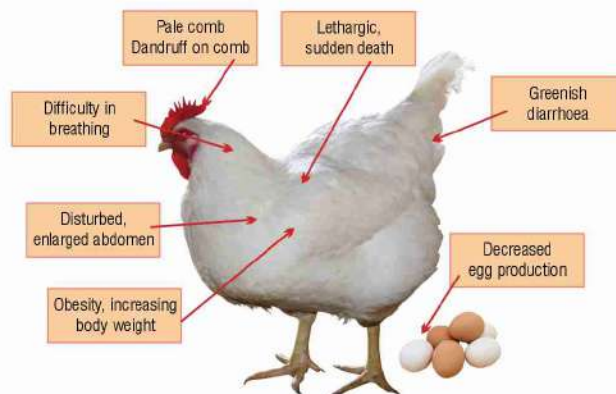

Reaction free

Accurate formulation

The liver is one of the largest and most sensitive organs, particularly in layers. It receives a major part of intestinal blood and acts to regulate blood glucose levels. Its primary functions are metabolic: maintenance of homeostasis, glucose, and lipid energy. It is a place of storage of nutrients and it synthesizes plasma proteins.

The liver also favors the body's creation of complex molecules (carbohydrates, proteins, glycoproteins) by precursors. There are other molecules that are created in the liver, such as cholesterol; cholesterol is involved in the digestion of fats or steroid hormones that govern reproduction. The liver ensures detoxification and excretion of endogenous and exogenous waste. It neutralizes toxic elements from the metabolism (bilirubin, ammonia, ketones) then transforms them into recycled nutrients and expels them via feces or urine. If the detoxification process does not function properly, toxic substances will accumulate in the liver; this build-up can hamper the various metabolic activities of hepatocytes.

#### Fatty Liver Disease

#### INDICATIONS:

Hepatic Dysfunction, Low appetite, Hepatitis, Jaundice, Anemia, Cirrhosis, of Liver, Fatty Liver Syndrome, Anorexia due to sluggish Liver, Supportive therapy in antibiotic and antiparasitic drug therapy.

#### ADVANTAGES :

- As a hepatoprotective in drug toxicity, aflatoxicosis and poisoning.
- As a metabolic stimulant in inefficient feed conversion debility and convalescence.
- Enhances and activates the liver metabolism.
- Promotes growth & weight gain.

# GROVAN

Liquid

Growth booster for cattle and poultry  
promotes healthy overall  
growth and immunity

## Composition :

Each 1000 ml contains:

DL methionine	127 gm.
Choline chloride	63.125 gm.
L-lysine	63.125 gm.
Sodium	459 mg.
Phosphorus	154.16 mg.
Magnesium	215.7 mg.
Ferrous	223.4 mg.
Copper	158.5 mg.
Cobalt	206.25 mg.
Manganese	384.55 mg.

## Usage Instructions :

### Each 100 birds

Chicks : 5-10 ml.

Broilers & Growers : 15-20 ml.

Layer : 25 ml.

or as directed by the veterinarian

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1litre & 5 litre

Highly effective in nature

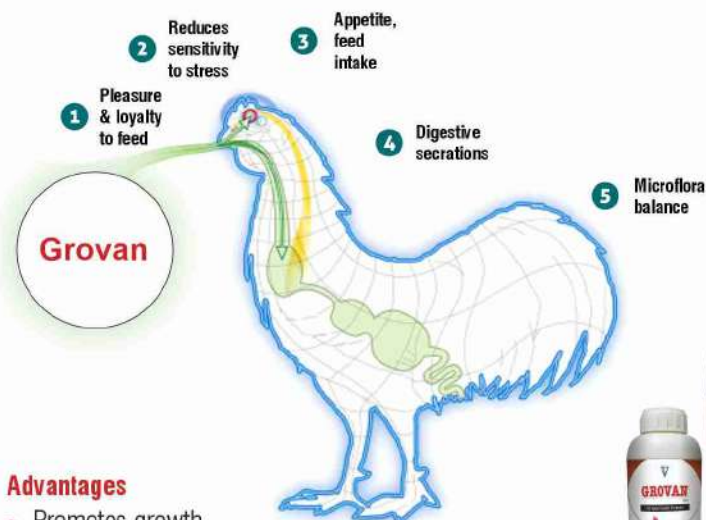

Reaction free

Accurate formulation

**Grovan** is the best growth booster that improves growth and development in cattle and poultry. Providing **Grovan** supplement daily to cattle helps in increasing weight gain. It is great for increasing milk production. When the immune system is fully functional, it can easily fight common infections like mastitis. It helps heifers reach early puberty and supports the animal throughout the pregnancy.

During the high lactation period, **Grovan** helps to increase milk production. It also helps in improving the immunity of young calves. Post-birth period introduces lots of stress to the cows, and **Grovan** can help alleviate these stress factors.

For poultry, **Grovan** benefits farmers by promoting weight gain. Broilers can gain fat and weight quickly while being disease resistant. It increases egg production in layers. Breeders also enjoy the benefits as the **Grovan** supplement improves reproductive ability and hatchability.

## Advantages

- Promotes growth
- Improves body weight
- Prevents production failure due to nutritional deficiencies
- Overcomes heat stress and other types of stress
- Reduces mastitis incidents
- Boosts recovery from infections
- B&T lymphocytes and macrophages boost the immune system
- Increases quality and size of eggs
- Increases milk production in cows
- Increases fertility and hatchability of female breeders

# Vitavan-C

Liquid

Liquid feed Concentrate for improves disease resistance and promotes overall growth.

## Composition :

Each ml. nutritional value :

Vitamin A	20,000 I.U.
Vitamin D3	8,000 I.U.
Vitamin E	48 mg.
Vitamin B12	20 mcg.
Vitamin H	30 mcg.
Vitamin C	250 mcg.
Zinc	18 mg.
Cobalt	250 mcg.
Organic nutritive base	q.s.

## Usage :

Chicks	: 5 ml.	100 Birds Daily
Growers	: 7 ml.	100 Birds Daily
Layers	: 10 ml.	100 Birds Daily

## Feeding Directions :

Poultry :  
As recommended by the veterinarian  
Appropriate over dosage added to compensate losses on storage

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1litre & 5 litre

Highly effective in nature

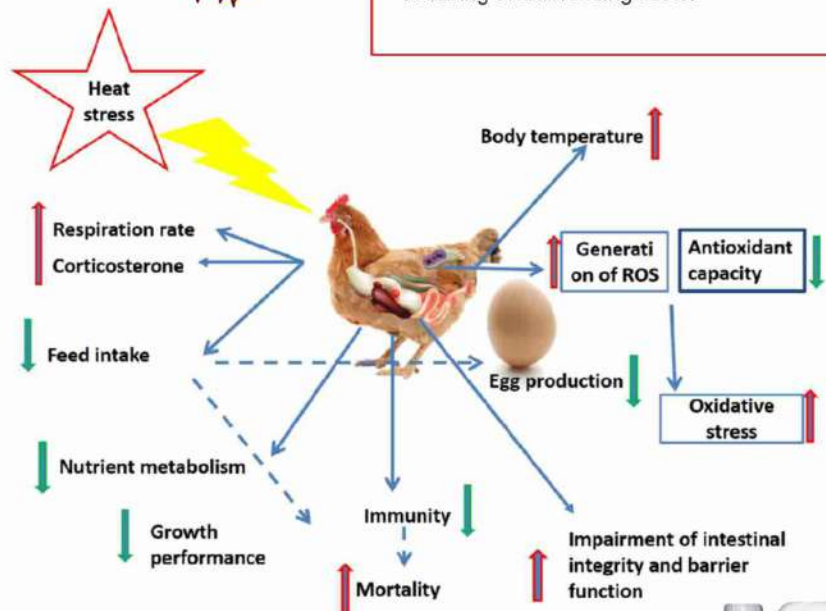

Reaction free

Accurate formulation

**VITVAN-C** is an organic vitamin B complex for poultry and cattle that greatly helps in reducing FCR. When the birds gain sufficient weight and leave the enclosed house without diseases, it increases profitability for farmers.

Heatstroke and stress are common problems for cattle because they are often exposed to extreme weather conditions. Continuous exposure of cattle to stress conditions results in anemia and general weakness. **VITVAN-C** has essential vitamin C and B complex that prevents problems associated with stress and heat stroke.

**VITVAN-C** also increases weight gain in broiler chickens. It strengthens poultry birds, resulting in increased egg production. By boosting the immune system, it greatly helps in reducing early chick mortality. The liquid organic supplement can be easily mixed in with the feed. It supports quick and fast recovery from various infections. By boosting feed intake and absorption of nutrition, it helps in reducing overall feeding costs.

## Advantages :

- Helps treat anaemia, muscle weakness
- Helps prevent diarrhoea, heatstroke, and stress
- Improves FCR
- Promotes weight gain
- Improves egg production in layers
- Protects birds from CRD and salmonella infection
- Prevents early chick mortality
- Enhancing immune response
- Improves performance
- Provide balance energy

# Selvan-E

Liquid

Liquid Feed Supplement  
Vitamin E Fortified With Selenium

## Composition :

Each 100 ml. Contains :

Vitamin E	10 gm
Selenium	200 ppm
Inert carrier	qs

## Usage & administration :

Chicks : 1 ml. in 2lt of drinking water  
Broilers : 1 ml. in 1lt of drinking water  
Layers : 1 ml. in 2lt of drinking water

Or as directed by the veterinarian

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1litre & 5 litre

Highly effective in nature

Reaction free

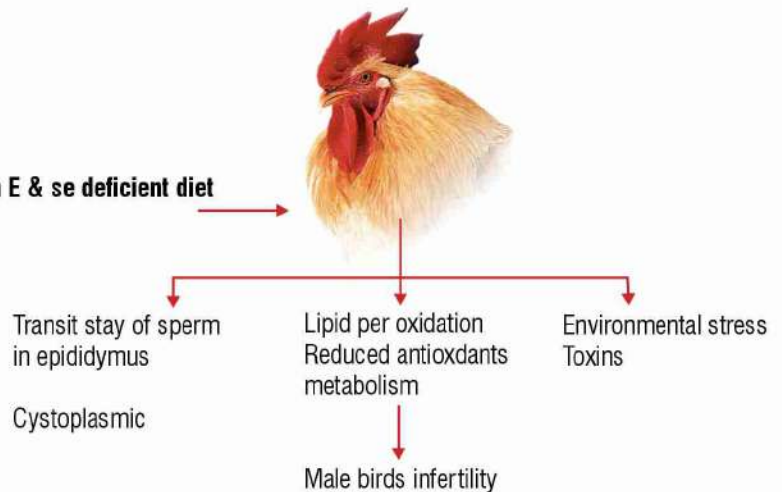

Accurate formulation

Selenium deficiency in newborn calves leads to white muscle diseases and retains the placenta in newly calved cows. Vitamin E and Selenium play a major role in the treatment of mastitis as deficiency of any one of them may lead to increased incidence of mastitis. Parturition immune suppression is mainly due to endocrine changes and due to feed intake of improper nutrients. Vit E is fat solvent vitamin not synthesized in rumen however it is essential for dairy cattle as well as calves.

Vit E is required for the control of nerves, muscles, heart, rumen, lungs. Male fertilizing as sperm motility also associated with SE and selenium deficiency leads to decreased conception rate in females cows. With the maintained level of blood selenium in cattle there are lesser chances of abortion

## Vitamin E & se deficient diet

## Advantages:

- Reduce Leg Weakness in Broilers
- To Overcome Stress in Poultry Birds
- Improves Milk Quality & Prevent White Muscle Disease in Cattle
- For proper growth, shape & size
- Restore strength, vigor & vitality
- Enhances body resistance & immunity

# Water Cola

Acidifier for GIT & Water

## COMPOSITION:

Each 100 ml. Contains:

Lactic acid	25 gm.
Citric acid	15 gm.
Formic acid	10 gm.
Phosphoric acid	02 gm.
Tartric acid	15 gm.
Buffered aqua base	q. s. 100 ml

## Usage :

For drinking water :  
Broiler, Breeder & Layer :  
0.2 ml / litre of water  
Or as directed by the veterinarian  
(Usage depends on water pH)

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1litre & 5 litre

Highly effective in nature

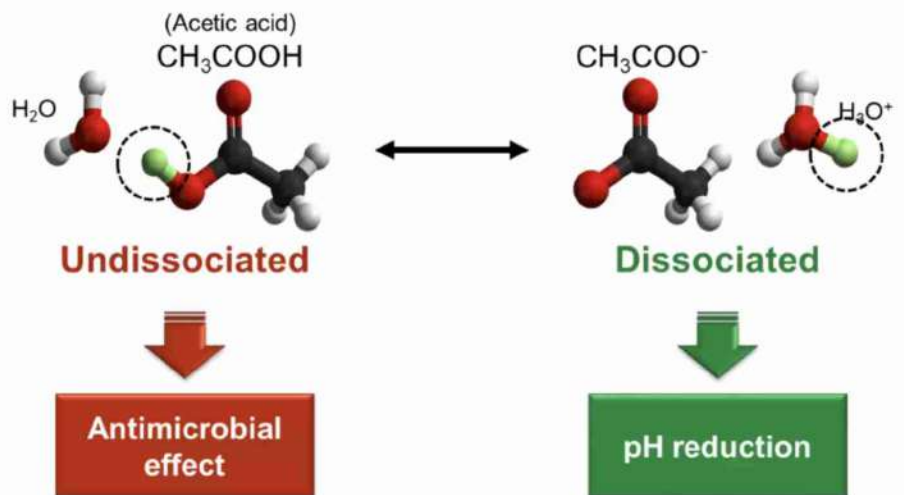

Reaction free

Accurate formulation

The major purpose of using this acidifier is to improve growth performance and better the profitability in poultry production. Organic acids have multi usages in poultry feeds as they help in preservation to control microbial growth, reduction of the feed buffer capacity, inhibition of pathogenic bacteria and betterment of nutrient digestibility.

The performance of poultry is enhanced by the addition of organic acids in diet as these organic acids decrease the pathogenic bacteria from feed. Most commonly the bacteria that affect the gut health of poultry include Salmonella, Clostridia, Entrococcus, Campylobacter and Escherichia coli.

**Water Cola** as a feed supplement in poultry has a beneficial effect on the overall performance of the broiler as well as layer birds. The effect of an individual organic acid is variable and depends upon several factors. Similarly different pathogenic bacteria respond variably to various organic acids.

## ADVANTAGES :

- Reducing pathogen load
- Sanitize Drinking Water
- Remove Dirt & Keep Water Clean
- Maintenance of internal PH
- Regulation of metabolic functions
- Improving FCR index & growth

# Respilyf

Oral Solution

An essential blend of oils to maintain respiratory functions

## Composition :

Each 100 ml contains

Thyme oil	25 %
Mint oil	20 %
Camphor	02 %
Menthol	10 %
Sorbitol	6 %
Eucalyptis	2 %
Sage	2 %
Ocimum sanctum	8 %
Adhatoda Vashika (Vasicine)	5 %

## Usage :

10 ml / 1000 birds twice daily in drinking water. Twice daily usage is recommended eg. early in the morning before 8 AM. & late in the evening after 7-30 PM. For quick and easy administration birds can be kept thirsty for 20 minutes.

Or as directed by the veterinarian.

Poultry Feed Supplement

Not for Medicinal / Human use

## Presentation:

250 ml., 500 ml. & 1litre

Highly effective in nature

Reaction free

Accurate formulation

## Advantages :

- To prevent and treat respiratory symptoms during outbreak of CRD coryza & other respiratory diseases
- To prevent & treat sneezing, coughing and labored breathing in infections/noninfectious causes.
- To overcome post vaccination reaction e.g. live NDV vaccination.
- Prevent reduction in growth rate.
- Reduction in use of antibiotic.

# Benza Guard

Liquid

Anti Viral, Anti Bacterial and Anti Fungal

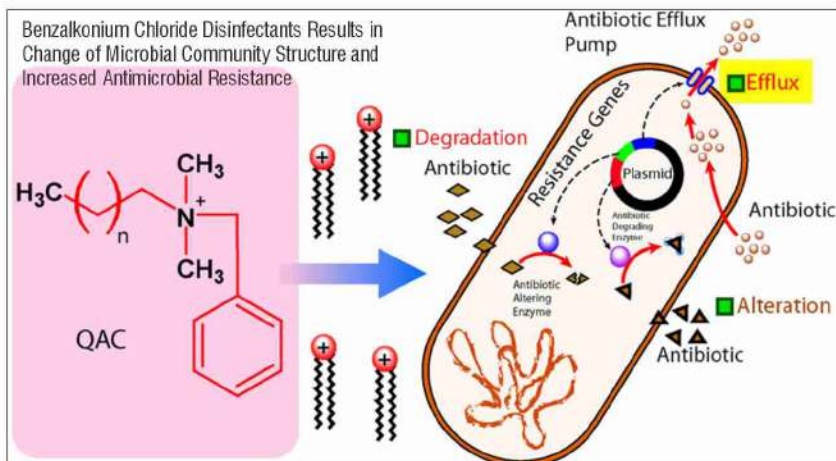

## Composition :

Benzalkonium chloride solution	12% v/v
Citric acid	8% w/v
Acetic acid	2% v/v
Inter ingredients	q.s.

The invention belongs to the field of medical sterilization and particularly relates to a benzalkonium chloride solution and a preparation method thereof. The benzalkonium chloride solution has the advantages of no irritation, resistance to organic matter interference, high disinfection performance and capabilities of promoting wound healing and scar fading and is applicable to cleaning and disinfection of the skin, wound mucous membranes and operative sites.

The infection problems such as wound, the surface of a wound and operative site be easily caused in surgical procedure and Post operation related complication send out Raw, or even jeopardize patient vitals. Therefore, preoperative from efficient, safe and stable Medical antiseptic solution, mucous membrane It is carried out sterilizing with wound site, removes bacterium and fungi of skin surface etc.

Type	Dilution	Method
• Shed with birds	8-10 ml./lt. of water	Spray
• Empty Shed	15-20 ml./lt. of water	Spray
• For drinking water sanitation	2 ml./20 lt. of drinking water	Add to water tank or drinking pot
• Hatchery use	10ml. / lt. of water	Spray of hatching eggs, foam hop
• Wetting agent in shed wash down.	1 lt. W-950 / 250 lt. of water	Spray or allow prepared solution to remain in pipelines

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 500 ml., 1litre & 5 litre

Highly effective in nature

Reaction free

# VB-PLEX

Liquid

Amino Acids & Vitamins  
Oral Liquid Feed Supplement  
For Poultry

## Composition:

Nutritional value per 5 ml.

vitamin B1	7 mg.
vitamin B	22.5 mg.
Vitamin B6	1 mg.
Vitamin B12	12.5 mg.
Biotin	25 mcg.
Calcium Pantothenate	2.5 mg.
Niacinamide	75 mg.
Choline Chloride	10 mg.
Methionine	10 mg.
Lysine	20 mg.

## Usage :

Poultry : for 100 birds	
Chicks	: 5-6 ml. Daily
Growers & Broilers	: 8-10 ml. Daily
Layers	: 10-15 ml. Daily
Cattle, Buffalo & Horse	: 30-50 ml.
Calf, Foal, Sheep,	
Goat & Pig	: 10-20 ml.
Dog	: 5-10 ml.

## Direction for use :

To be given daily as such or through drinking water

Or as directed by the veterinarian

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1litre & 5 litre

Highly effective in nature

Reaction free

Accurate formulation

Decreased mortality rate

Longer life of production

Improved fibrous content

Enhanced hatch rate

Increased breast, thigh & body weight

Molting deterrent

Better feed conversion ratios

Earlier feathering

Immune response boosted

Improved egg shell quality

Healthier and stronger generations

Fewer egg shell cracks

## Advantages :

- Improves egg output in layers
- Improves egg shell quality
- Improves growth rate
- Prevents anorexia & constipation
- Prevents fat deposition on liver
- Improves metabolism
- Anti stress

Saharanpur-247 001(INDIA)

Vitamins are necessary micronutrients that are not generated naturally. These vitamins must be available in the feed for cattle and poultry for healthy growth. Apart from growth, essential vitamins promote the optimal immune system and boost reproduction and lactation. Finding reliable and cheap vitamin sources is always a struggle for farmers because too many supplements will increase feeding costs.

The cost of cattle feed continues to increase, and farmers find it hard to reduce feeding costs. For early chick mortality is one of the biggest challenges because broiler chickens are often raised in enclosed houses without proper climate control. The quality of birds and eggs continues to decline as new diseases threaten chicken health.

Maintaining a hygienic and temperature-controlled environment is crucial for both cattle and poultry. The feed offered must be supplemented adequately to ensure that birds grow rapidly.

# Goutvin

Liquid

Maintains healthy functional renal mass & Gout in Birds

## Composition :

Each 10 ml. contains :

Sodium H. Carbonate	1.5 gm
Ammonium Chloride	1.0 gm
Sodium Citrate	1.2 gm
Ascorbic acid	0.15 gm
Buffer & Stabilizers	qs

## Usage Instructions :

Each 100 birds

Chicks : 5-10 ml.

Broilers & Growers : 15-20 ml.

Layer : 25 ml.

or as directed by the veterinarian

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1litre & 5 litre

Highly effective in nature

Reaction free

Accurate formulation

**Nephoclin** is a very effective tonic for poultry that controls various metabolic disorders. The first step to the prevention of gout is to regulate uric acid secretion. **Nephoclin** helps in water retention so that excess uric acid is not secreted by your chickens.

**Nephoclin** strengthens the kidneys by helping with metabolic waste excretion. It also removes the crystallization of uric acid in joints, ligaments, and tendon sheaths. It is sufficient to use for urinary tract infection, ascites, and gout in the birds. As it is herbal medicine, it doesn't have any harmful side effects. The supplementary feed can be given when problematic symptoms are noted. It helps in water retention so that excess uric acid is not secreted by your chickens. It also helps in dissolving urates crystals so that excretion doesn't create a problem. It is preventing excessive fluid buildup in the body, it promotes the health of the kidneys.

## Advantages :

- Unique remedy against Ascites, Gout, and Gumboro
- Improves renal system
- Prevents uric acid over secretion problems
- Removes waste products from the body effectively
- Maintains healthy functional renal mass.
- Minimizes incidence of Gout in birds.

Accurate formulation

CRD (Chronic Respiratory Disease) in poultry has some common symptoms such as wheezy breath and face swelling among others. This is a typical disease in poultry in transition seasons, occurs in all ages. Chickens between 3-6weeks of age and laying hens are more susceptible than other group ages.

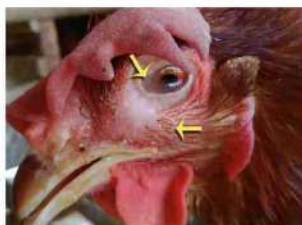

In case of stress condition as transportation, heat, humidity, high stock density, etc poultry birds are more prone to pathogens as Mycoplasma, Herpes virus, etc These all leads to Respiratory problem. Some other as fungal infection as Aspergillus leads to Inflammation of lungs, Air sacs, etc. Bacterial infections as Pasturella leads to Pneumonia.

CRD is Chronic Respiratory Disease is seen in backyard fowls leading to Snuffing, Sneezing, Coughing, etc. **CORIVIN** is the best supportive therapy in Respiratory disease of any origin as it favors soothing of the respiratory tract and faster recovery.

Distorted eggshells due to E.coli

Swollen face due to CRD

Difficulty in breathing

Oral and nasal discharge

## Indications & Benefits :

- For prevention and treatment of Chronic Respiratory Disease (CRD) and associated symptoms viz cough, sneezing, nasal discharge, tracheal rales, gasping, unthriftiness etc.
- Highly effective for the treatment of E.Coli, Coryza, Mycoplasma, Gallisepticum, Salmonella, Wing Rot, Fowl Cholera, White Diarrhoea etc.
- Helps to Cure Cough, Cold and Respiratory Ailments
- Reduces Risk of Stress and Pain
- Facilitates Easy Breathing during Changing Weather

# VB-LIV

Powder

**A Natural way to keep Liver healthy,  
Increase weight, Improve FCR,  
Better growth Enhance productivity  
and Reduce mortality**

## Composition:

Silybium marianum	20 %
Andrographis paniculata	25 %
Glycine max	15 %
Azadirachata indica	20 %
Helianthus annuus	20 %

## Feeding Ratio:

1 Kg per ton of feed can replace  
1 Kg of L-Lysine.

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1kg, 5 kg & 25 kg

Highly effective in nature

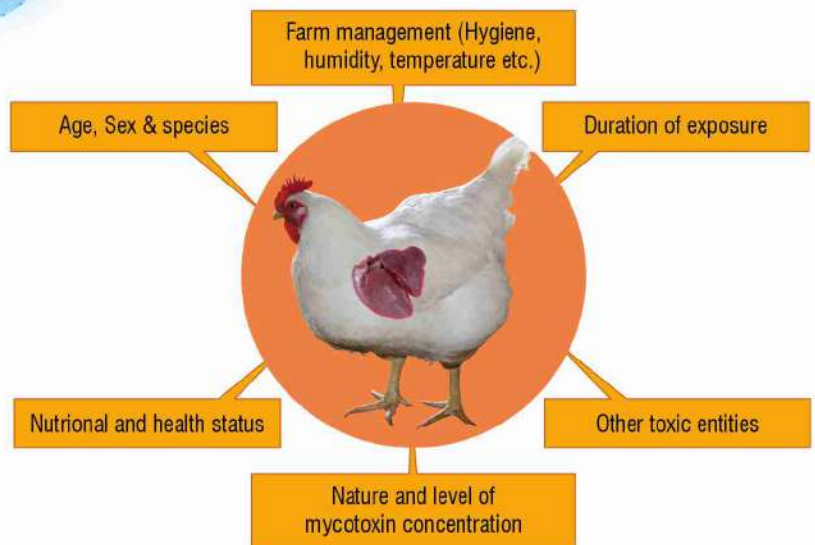

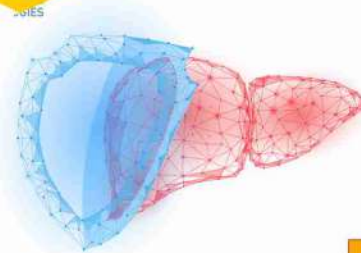

Reaction free

Accurate formulation

The liver has several functions in digestion, metabolism, and absorption. It is also an important immune organ. Here we would like to discuss about the functions of the liver and the importance of the liver in production.

The liver plays a key role as the center for a number of metabolic and productive activities. Metabolism of chemicals, carbohydrates, absorption of proteins, digestion of fats. The catabolism of excess amino acids, the formation of uric acid from ammonia, and the formation of albumin are also a major event that occurs in the liver.

It acts as a filter that processes and removes toxins from wastes produced by your own metabolism, toxins, and harmful chemicals from the environment. Almost all chemicals, including toxin components in feed and chemical compounds in medicine, are also metabolised and detoxified by the liver.

## Indications:

- Fatty liver syndrome
- Liver enlargement
- Low protein synthesis
- Cholecystitis & cholangitis
- Drug induced hepatotoxicity

# Immuvin

Liquid

Promotes higher production  
Enriched Vit E, Se & Polysaccharides

## Contents :

Vitamin E  
Selenium  
L-Glutamine  
Tryptophan analogs  
Amino nitrogen  
Emblica officinalis,  
Ocimum Sanctum  
Polysaccharides  
with fortified base.

## Usage :

Each 100 birds  
Chicks : 5-10 ml.  
Broiler : 20 ml./100 birds  
Layer : 25 ml./100 birds

Or as directed by the veterinarian.

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1litre & 5 litre

Highly effective in nature

Reaction free

Accurate formulation

The demand for poultry products continues to rise due to increased human consumption. The poultry farmers have to focus on disease control, increased production, higher product quality. The continuous changes in the environmental conditions pose additional challenges to the growth of the birds. Especially during the COVID 19 pandemic, farmers have to take extra safety measures to protect the birds.

**Immuvin** is the best product for boosting immunity in poultry. It contains multiple herbal extracts that aid in the proper development of the birds. In high-density broilers, the best way to control diseases is to prevent the spreading of diseases.

The most common disease infectious bursal disease (IBD) which causes gumboro in young chickens can be effectively prevented by supplementing the feed regularly with **Immuvin**. When birds start showing drowsiness, lameness, white chalky diarrhea, and reduced feed intake, **Immuvin** can be included as a supplemental feed for a few days to overcome the problem.

## Benefits :

- Helps in Stimulating fast recovery during out break.
- Improve livability.
- Improve weight gain
- Improve general diseases resistance
- Reduces incidences of metabolic stress.

# VITVAN-A

Liquid

## Liquid Supplement of Vitamin A for Poultry Feeding

Each ml. has nutritional value of :  
Vitamin A 1,20,000 I.U.  
(As vitamin A palmitate)

### Usage :

Poultry : Each 100 birds  
Chick: 2 - 5 ml. / 100 daily  
Growers & Broilers : 5 - 10 ml. daily  
Layers: 10 - 15 ml. / 100 daily  
Cattle & Large Animals : 10 - 20 daily

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1litre & 5 litre

Highly effective in nature

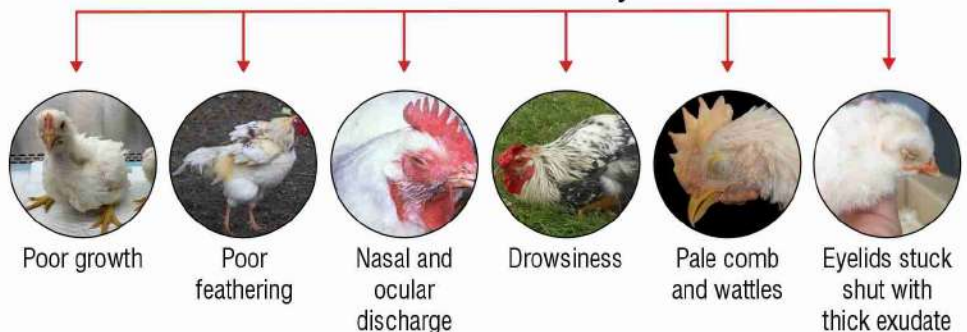

Reaction free

Accurate formulation

When the availability of green grass for grazing is less, cattle should be supplemented with an effective Vitamin A supplement. **Vitvan A** not only helps with health, but also improves reproduction. It encourages development of bones, teeth and nervous tissues. It helps in improving the lining of the digestive, respiratory and reproductive systems. When gut health is improved, it improves absorption of nutrients from cattle feed.

Major improvement in the reproductive nature of cattle can be noted after introducing Vitamin A supplement in the diet. Calves receive most of their Vitamin A by drinking colostrum from the mother cow. In adult cows, the availability of Vitamin A in the body must be evaluated before the calving stage. This will ensure that the calves don't abort and birthing of still born calves can also be avoided. It can be mixed with mineral mixes and commercial cattle feed products.

### Vitamin A Deficiency

### Useful in :

- Controls vitamin A deficiency in stress conditions
- Combats blind calving problems
- Improves growth, maintenance and regeneration of skin and muscle cells
- Improves bone formation
- Improves fertility
- Stimulates antibodies and enhances immunity
- Improves FCR
- Increases egg production
- Functions as growth promoter for poultry
- Prevents birthing of dead or weak calves

# Coccivin

Liquid

A herbal supplement for  
Prevents of Coccidiosis

## Compositions:

Each 100 ml. contains :

Punica granatum	100 mg.
Aegle marmelos	150 mg.
Trachyspermum ammi	100 mg.
Tinospora cordifolia	100 mg.
Cyperus rotundus	100 mg.
Zingiber officinalis	100 mg.
Berberis aristata	100 mg.
Acacia catechu	80 mg.
Holarrhena antidysentrica	80 mg.
Calotropis procera	50 mg.
Salmaia malabarica	40 mg.
Aqua	q.s.

## Usage:

### For Prevention:

30 ml. per 100 birds for 4-5 days

### For Curative:

50 ml per 100 birds for 4-5 days

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 500 ml & 1 litre

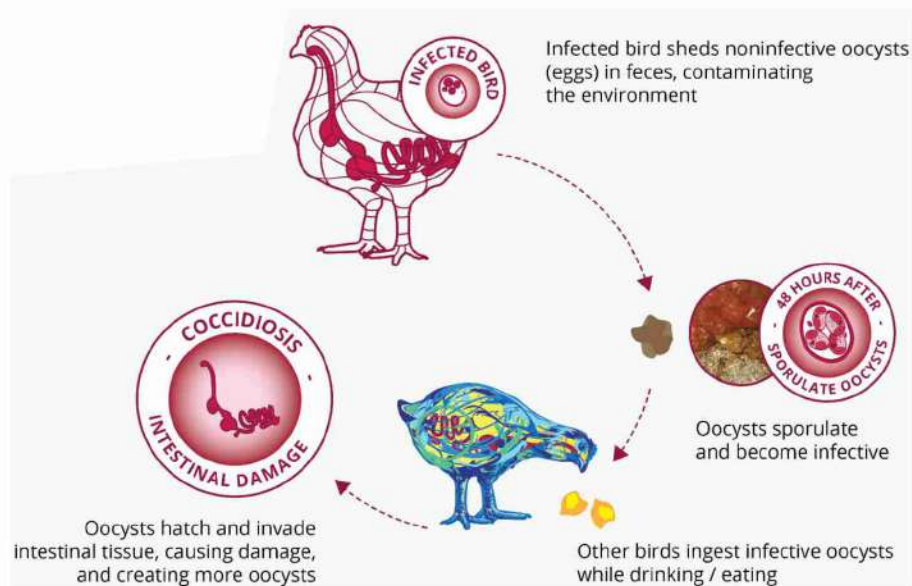

Highly effective in nature

Reaction free

Accurate formulation

When the birds are always kept on wired floors away from their droppings, the occurrence of coccidiosis can be effectively contained. The vaccines don't offer complete protection against the infection. The best way to prevent and treat coccidiosis is to use anticoccidial drugs.

**Coccivin** tonic is the safest and most effective coccidiostat used in poultry farming. It effectively eliminates all strains of coccidian protozoa. It helps in eliminating the contaminants in the atmosphere. As a result, birds are not exposed to large volumes of sporulated oocysts, effectively preventing infections. It is the safest option for birds as it kills the protozoa without causing any problem for the birds. **Coccivin** is also compatible with different types of chemicals commonly used in poultry farming. These chemicals and antibiotics are not helpful in preventing coccidiosis, but the addition of **Coccivin** to regular feed makes the enclosed house much safer for the birds.

## Benifits:

- Prevents intestinal and caecal coccidiosis.
- Prevents secondary bacterial infection.
- Exhibit wide margin of safety.
- Allows the chicken to attain optimal growth and production.
- Prevents economic loss due to coccidiosis.

# Toxivin

Powder

Powerful Toxin Binder and Neutralizer  
For Effective Control of Mycotoxins

## Composition :

Each 100 ml. contains :

Tricholine Citrate	600 mg
Phosphoric acid	200 mg
Vitamin B	80 mg
Vitamin B2	5.00 mg
Biotin (Vit H)	100 mg
Nicotinamide	800 mg
Calcium chloride	225 mg
Protein Hydrolysate	200 mg
Methionine	20 mg.
Yeast Extract	100 mg.
Magnesium chloride	260 mg
Cobalt	3.0 mg
Copper	3.5 mg
Zinc	280 mg
Iron	250 mg
Potassium iodide	3.5 mg

## Feeding Ratio:

1 Kg per ton of feed can replace

Or as directed by the veterinarian

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1kg., 5 kg., & 25 kg

Highly effective in nature

Reaction free

Accurate formulation

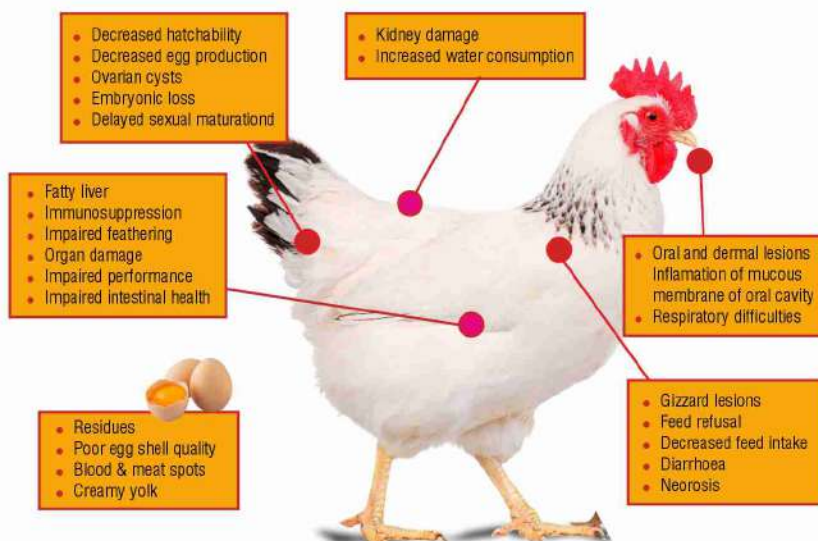

Mycotoxins have been detected in various food commodities from many parts of the world and are presently considered as one of the most dangerous contaminants of food and feed.

Adverse effects of mycotoxins on animal health and production have been observed in farm animals such as poultry as a consequence of the consumption of high levels of cereals and oilseeds in the diet.

**Toxivin** is a high quality modern tool in Mycotoxin management. It is not only a strong toxin binder but also a toxin destroyer. The specific properties of the product inactivate the mycotoxins in the stomach of the animal through which they are no longer harmful for the animal.

**Toxivin** causes a redox reaction which bio-transforms the toxic structure of Mycotoxins. The result is a non-toxic metabolite which is harmless to the animals and can be easily excreted

## Effects of Mycotoxine

## Advantages :

- Multi fungal toxin binder
- Heat & vaccine stress inhibitor
- Increases beneficial bacteria in the intestine
- Removes harmful bacteria from the drinking water
- Does not bind vitamins, minerals and other nutrients.
- Protects from liver disorder.
- Stimulates the immune system.
- Increases feed consumption and feed efficiency.

# VB Meth

Powder

Provide 100% Bioavailable  
Natural Methionine....

## Composition :

Each gm contains:	
Embelica officinalis	20 %
Glycine max	25 %
Allium sativum	10 %
Silybium marianum	12 %
Eclipta alba	15 %

## USAGE & ADMINISTRATION :

500 gm - 1 kg VB Meth / M ton  
to be mixed in prepare feed

Or as directed by the veterinarian

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1kg.,5 kg & 25 kg

Highly effective in nature

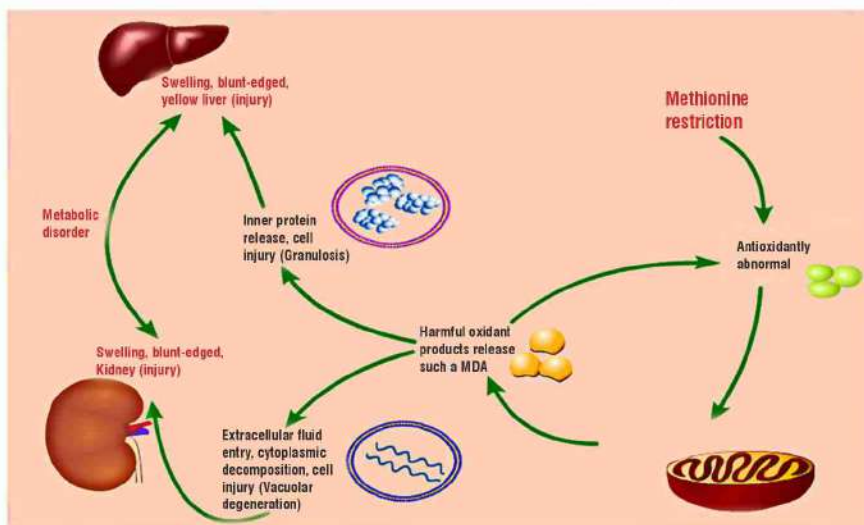

Reaction free

Accurate formulation

A methionine deficiency typically leads to poor feed conversion, retarded growth in meat birds, and reduced egg production in layers and breeders. Methionine is required to provide the building blocks for immune cells and tissues. This includes the nonspecific mechanisms such as the skin and mucosa, and the specific mechanisms that include T and B lymphocytes. This is particularly important for newly hatched chicks that are highly susceptible to infection during the first two weeks of life.

Methionine is a major component of feathers. Methionine and cysteine (another sulfur-containing amino acid that is not essential in the diet) are critical to feather formation. A deficiency of methionine results in poor feather growth and increased feather pecking. A methionine-deficient bird will tend to eat feathers in an attempt to obtain enough methionine. Feather pecking can quickly turn into cannibalistic behavior in a flock

## Methionine Deficiency Affects Liver and Kidney Health, Oxidative Stress, and Ileum Mucosal Immunity in Layers & Broilers

## Advantages:

- Improve skeletal & Muscular growth
- Improve FCR & anabolic effect.
- Optimum production
- Enhanced convalescence
- Healthy digestion
- Early recovery from skin diseases & Feather loss

# Folimust

Iron tonic with chelated minerals

## Compositions:

(Each 10 ml Contains)	
Ferric ammonium citrate	1450 mg
(eq. to 300 mg of Fe)	
Chelated copper glycinate	500 mg
(eq. to 100 mg of copper)	
Cobalt	1.5 mg
Cholecalciferol	5000 IU
Nicotinamide	75 mg
Biotin	200 mcg
Folic acid	2 mg
Cyacobalamin	150 mg
Excipients	qs

## Usage & Administration :

Chicks	: 5-10 ml / 100 birds daily
Growers	: 10 ml / 100 birds daily
Layers / Broilers	: 20 / 100 birds daily
Breeders	: 30 ml / 100 birds daily
Large Animals	: 30- 50 ml daily

Or as directed by the veterinarian

Poultry Feed Supplement

Not for Medicinal / Human use

Iron Is an Essential Component of Ruminant Body. Young Animal on Milk Diet May Suffers from Iron Deficiency. Continuous Loss of Blood May Leads to Iron Deficiency. Sufficient Iron Is Essential for Calves as It Is Required for Various Physical Processes Especially in the production of "Hb" in Muscle where it binds to Oxygen and Transport it to Body. Iron has also the role in the production of antibiotics in the body.

**Ferrorise** is Generally Recommended in Anaemia, Stunned Growth, Rickets, Osteomalacia, Milk Fever and in Poultry to Egg Production.

Decreases Rbc and Hb Leading to Loss of Appetite, Weight Loss, Anaemia, Oedema, Abortion, etc. So an Iron Deficiency Seen Due to Loss of Blood in Surra and **Ferrorise** is Found to Be Highly Effective Here to Recover Hb Levels.

Haemorrhagic Anemia is Common and Leads to Decreased Hb Levels in Body So **Ferrorise** Is Best Solution to Recover Hb Levels.

## Advantages :

- Helps in the formation of Hemoglobin.
- Purify the blood and increase the blood circulation
- Minimize the incidence of infections by stimulating the immune system.
- Stimulate humoral and cell mediated immunity and control viral injury.
- Improve F.C.R., increases egg production & Better weight gain.
- Reduce incidence of mortality.
- Control immune suppression.

# VB Clear

Liquid

Clear preparation of  
Calcium, Vitamins and Amino acids

## Composition :

Each 100 ml. contains	
Calcium lactate	4800 mg.
Calcium Gluconate	4500 mg.
Vitamin B <sub>12</sub>	100 mcg.
Vitamin D <sub>3</sub>	9000 I.U.
Lysine hydrolysate	100 mg.
DL- methionine	100 mg.
Choline chloride	100 mg.

## Usage Instructions :

### Each 100 birds

Chicks	: 5-10 ml.
Broilers & Growers	: 15-20 ml.
Layer	: 25 ml.

or as directed by the veterinarian

Poultry Feed Supplement

Not for Medicinal / Human use

Presentation: 1litre & 5 litre

Highly effective in nature

Reaction free

Accurate formulation

Calcium supplements for chickens can help you avoid shell quality issues in your flock, and it's easy to feed. Farmers have been adding calcium to the diet of layers for generations to improve shell quality, and consequently, we've learned a few things about it.

Calcium is an essential nutrient in the diet of poultry. Not only do chickens need to build and support healthy bones, but they also need enough free calcium in their diet to produce a hard eggshell.

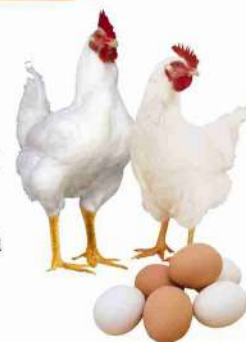

Not all shells are created equal. An ideal shell is relatively smooth, evenly colored, and maintains a consistent shell thickness. Sometimes you get bumps and deposits on your shells, which is no big deal. If, however, you see dark spots that crack easier than the rest of the shell, you have thin spots. Additionally, if your eggs are breaking too easily, you may be experiencing thin shells.

## Mode of Action

## Advantages :

- Provides more bio-availability of calcium during hypocalcaemia
- Increases egg quality and thickness of shell
- Useful in leg weakness & strong the bones
- Curing from osteoporosis and Osteomalacia
- Prevents general weakness & debility
